Dear Dave:

As you know, applicable relevant and appropriate state and Federal statutes covering work proposed at the Weldon Spring Site was discussed at the 12/5/86 meeting with EPA in Kansas City. Missouri's Hazardous Waste Management Law, Chapter 260, Section 260.355(1) specifically exempts radioactive waste regulated under Title 42, Section 2011, United States Code. DOE believes that the primary criteria to be followed for project design and onsite waste disposal of radioactive waste are the Uranium Mill Tailing regulations developed by EPA and contained in 40CFR192.

Missouri laws for disposal of non-radioactive hazardous waste do apply and will be followed. Other state statutes implementing the clean water act, the clean air act and the historic preservation act will also be followed. Please advise us of any other Missouri statutes that may apply to the proposed project work.

Sincerely,

for R. R. Nelson
Project Manager
Weldon Spring Site
Remedial Action Project
