G. AND JCT. OFFICE

Sept 5, 2002

Attention: Audrey Berry,

I want to address my concern for the Weldon Spring radioactive containment or clean-up. We live close to the area and are very disappointed in the soil or rock mountain that is suppose to solve the problem. I think it is a joke! what about our water.

G-1

Response G-1: The decision to construct an on-site disposal facility was reached through a public process and the affected communities in St. Charles County reached a consensus opinion to allow it. St. Louis County and St. Charles County public drinking water is safe.

G-2

If we cannot control the radioactive by products we should stop producing it

Response G-2: Comment noted.
