K-65 WEEKLY REPORT

2372

November 1, 1991

Operational Readiness Review for Bentonite Installation

The Operational Readiness Review for the Removal Action will be held on November 12, 1991, rather than November 13, 1991.

Removal Action

The equipment test for the bentonite installation equipment remains scheduled for Monday, November 4, 1991, with equipment delivery on November 6, 1991. The evaluation of the equipment at the vendor's facility, by site personnel, has thus far been very positive. The equipment appears to have been constructed and assembled in accordance with the specifications/requirements.

Prior to the initiation of the removal action, a training drill will be held to physically demonstrate the emergency procedures for the Silos, i.e., tarps, water application. The participation in the drill will include all site Emergency Duty Officers.
