SUBMITTAL OF FINAL SITEWIDE TREATABILITY STUDY PLAN FOR THE ROCKY FLATS PLANT - JMK-0549-91

Enclosed is the Final Sitewide Treatability Study Plan (TSP) dated August 26, 1991 for the Rocky Flats Plant (RFP). This document has been prepared in response to the Interagency Agreement (IAG) requirements and in response to comments from the Environmental Protection Agency (EPA) and the Colorado Department of Health (CDH) on the final draft TSP.

As discussed and agreed upon during an IAG managers' meeting on August 6, 1991, the Treatability Study Report, which is scheduled in the IAG for delivery to EPA and CDH in the Spring of 1993, will be deleted from the list of milestones and an Annual Report substituted in its place. This change has been reflected in the Final Treatability Study Plan. This Annual Report will be a Fiscal year Treatability Study Report and will be issued in March of the following fiscal year as indicated in the document. Changes in response to the comments from EPA have also been incorporated in the Plan. At a June 15, 1991 meeting, CDH verbally indicated that they have no comments on the document.

Since all of the comments from EPA on the document were already agreed upon at the time comments from DOE/HQ were received, only the comments which do not require substantial changes to the document have been incorporated into this version of the TSP. The remaining comments from DOE/HQ will be taken into consideration during preparation of the Annual Report.

Please contact T. C. Greengard at extension 7121 or O. Erlich at extension 5959, if you have any questions.

J. M. Kersh, Associate General Manager
Environmental and Waste Management
