Fernald Cleanup Progress Briefing

In the spring of 1999, Fernald will begin to excavate and ship, by rail, waste materials from six pits.

To accomplish this cleanup milestone, Fernald must complete several important steps over the next six months, such as construction of treatment facilities, finalization of the railroad contract and rail operator training.

If you would like to learn more about the Waste Pits and other Fernald cleanup projects, plan to attend the Cleanup Progress Briefing on

Tuesday, Nov. 10 at 6:30 p.m.

The briefing will be held at the Fernald site, 7400 Willey Road off State Route 128.

1854

Visitors must show a drivers license or valid photo identification to the Fernald Security Officer when entering the site. Handicapped parking is available. For more information, contact Gary Stegner, Department of Energy, at 513-648-3153.
