Fernald Cleanup Documents

The "*Draft Plant 5 Complex Implementation Plan for Above-Grade Decontamination and Dismantlement*" is available to the public at Fernald's Public Environmental Information Center (PEIC), 10995 Hamilton-Cleves Highway.

The plan identifies the design strategy for dismantling the Plant 5 Complex, which includes eleven structures at the Fernald site. The Department of Energy submitted the plan to the U.S. Environmental Protection Agency and Ohio EPA on Jan. 25, 1999, for review.

The "*On-Site Disposal Facility Soil Borrow Evaluation*" will also be available at the PEIC by mid-February. The report provides an evaluation of the quantity of in situ (in place) clay needed for the On-Site Disposal Facility.
