OPERABLE UNIT NO. 11, WEST SPRAY FIELD, MILESTONE MODIFICATION - MBA-033-93

Ref: R. L. Benedetti ltr, RLB-0752-93, to Robert M. Nelson, Jr., Rescoping of the Operable Unit No. 11 (OU 11) West Spray Field RCRA Facilities Investigation/ Remedial Investigation (RFI/RI), December 9, 1992

A complete scoping report for Operable Unit No. 11 (OU 11) was due to the Department of Energy (DOE) on March 2, 1993. That milestone has been missed. DOE was aware that the milestone would not be met due to lack of written concurrence with the OU 11 scope change and has verbally acknowledged approval. Rescoping of the project is in progress. A Contaminants of Concern list is being generated by EG&G Environmental Restoration Risk Assessment in order to support development of a revised Field Sampling Plan (FSP) and Data Quality Objectives (DQOs) designed to streamline the OU 11 field investigation. The goal of this effort is to provide data supporting a justification for No Further Action. The estimated date for completion of the revised draft FSP is April 21, 1993.

As mentioned in the above-referenced correspondence, EG&G Environmental Remediation is postponing further action on the rescoping of OU 11 until written concurrence is received from DOE. Future tasks include shifting of current FY93 funding and concurrence of new scope through the Change Control Board.

Please provide guidance in this matter so that rescoping can begin in earnest. Please contact T. P. O'Rourke of Remediation Project Management at extension 8577 if you have any questions.
