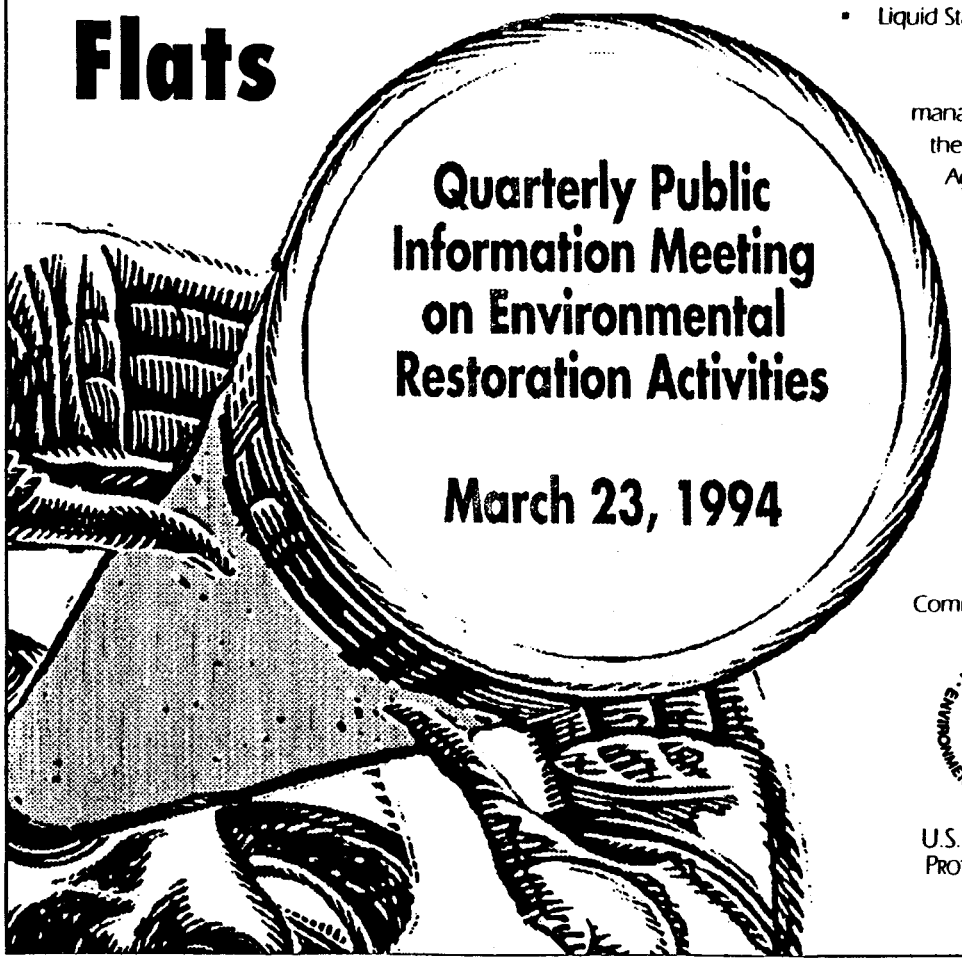
Focus on Cleanup Activities at Rocky Flats

The U.S. Department of Energy, the U.S. Environmental Protection Agency and the Colorado Department of Health invite you to attend a Quarterly Public Information Meeting to learn about and discuss environmental restoration work at the Rocky Flats Site.

The main topics to be discussed will include:

- Operable Unit 2, 903 Pad, Mound and East Trenches
  A status of the Final Treatability Study Report for the Surface Water Interim Measure/Interim Remedial Action
- Operable Unit 4, Solar Evaporator Ponds
  This operable unit includes five ponds that were used in the past to store and evaporate contaminated water from the process buildings. An update will be given as to where this program is today and what has been accomplished
- Operable Unit 16, Low Priority Sites
  Response to Comments on the No Further Action Proposed Plan and an update for the next step
- Fiscal Year 1994 clean-up budget
  - Liquid Stabilization of Radioactive Solutions



General information about other environmental management projects will also be presented by representatives from the U.S. Department of Energy, the Environmental Protection Agency and the Colorado Department of Health.

Please join us:

Quarterly Environmental Restoration Public Information Meeting
Wednesday, March 23, 1994
7:00 to 9:00 p.m.
Denver Marriott West
I-70 at Exit 263
1717 Denver West Boulevard
Golden, Colorado

For more information please contact Todd Wollard, EG&G Community Relations, (303) 966-6232.

Environmental Assessment Completed

Based on the findings of an Environmental Assessment conducted last year, the U.S. Department of Energy has determined that resumption of thermal stabilization activities in Building 707 at Rocky Flats will not significantly affect the quality of the environment. Therefore, a "Finding of No Significant Impact" has been issued.

Thermal stabilization is a controlled heating process that will convert plutomium into a safer, non-combustible form. No date has been set for resumption of thermal stabilization since the phased start-up will require completion of a readiness review and approval from the Secretary of Energy.

Copies of the Building 707 Thermal Stabilization Environmental Assessment, Comment Response Document, and the Finding of No Significant Impact are available for review at the following locations:

U.S. Environmental Protection Agency
Region VIII Superfund Records Center
999 18th Street, Suite 500
Denver, Colorado 80202-2405
(303) 293-1807

Colorado Department of Health
4300 Cherry Creek Drive South, Building B2
Denver, Colorado 80222-1530
303-331-6733

Rocky Flats Public Reading Room
Front Range Community College
