RE: Reconnaissance Level Characterization Report (RLCR) for Sewage Treatment Plant Effluent Cells 995-EC1, 995-EC2, & 995-EC3 – Concurrence

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the RLCR for Sewage Treatment Plant (STP) Effluent Cells 995-EC1, 995-EC2, & 995-EC3, Revision 0 dated November 16, 2004. We received this RLCR on December 3, 2004. Based on the information contained in the RLCR, we are hereby concurring with the determination that Effluent Cells 995-EC1, 995-EC2, & 995-EC3 are Type 1 Facilities.

As part of the Sanitary Sewer System being dispositioned by ER and D&D, the actions being performed need to be appropriately integrated so that the disposition of these Effluent Cells and disruption (plugging or removal) of the influent and effluent lines associated with these Effluent Cells can be properly performed and documented in the closeout report(s) for the STP and Sanitary Sewer System.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
