Proposed Plan: Operable Unit 11, West Spray Field

The U.S. Department of Energy (DOE) has released the Proposed Plan and Draft Modification to the Colorado Hazardous Waste Permit for Rocky Flats Environmental Technology Site for closure of Operable Unit 11, West Spray Field.

The plan describes proposed actions associated with closing an area of approximately 105 acres in the Rocky Flats buffer zone. Spray application of sewage treatment plant effluents and interceptor trench ground water occurred in this area between April 1982 and October 1985. This plan recommends clean closure under the Resource Conservation and Recovery Act.

The Environmental Protection Agency and the Colorado Department of Public Health and Environment, working with DOE, will make the final decision on the closure, including a Hazardous Waste Permit Modification, only after regulatory agency and public comments are considered.
