The Department of Energy Announces Environmental Assessment.

Proposed Resumption of Thermal Stabilization Operations in Building 707

The U.S. Department of Energy has announced its intention to prepare an Environmental Assessment for the proposed resumption of thermal stabilization operations in Building 707 at the Rocky Flats Plant.

This environmental assessment is being prepared to comply with the National Environmental Policy Act. The U.S. Department of Energy invites public participation in identifying the areas to be addressed in the environmental assessment.

You are invited to attend a public meeting to discuss the proposed scope and process for the environmental assessment on July 7, 1993 from 7:00 - 9:00p.m. at the Ramada Hotel, 8773 Yates Drive in Westminster.

At this meeting representatives from the Department of Energy and EG&G Rocky Flats will present details and answer questions regarding the proposed thermal stabilization process and the environmental assessment. You are encouraged to use this meeting to make suggestions regarding the scope and content of the environmental assessment.

Upon completion, the draft Building 707 Thermal Stabilization Environmental Assessment will be made available for public review and placed in the public reading rooms. A thirty-day comment period will begin the day the document's availability is advertised.

For more information on the Building 707 Thermal Stabilization Environmental Assessment, contact Beth Brainard-Jordan, Director of Communications, U.S. Department of Energy Rocky Flats Office, PO Box 928, Golden, CO 80402-0928, or telephone (303) 966-5993
