NFA Designations for Recent Characterization Sites – JLB-007-03

Kaiser-Hill has prepared and forwarded to the Department of Energy for submittal to both the CDPHE and EPA numerous reports regarding characterization activities during the past year These include data summary reports for IHSS Groups 000-1, 400-10, 500-6, 600-6, 700-12, 900-2, and 900-4 & 5 The data were collected in accordance with approved SAPs and any deviations discussed with DOE and Agency staff as well as documented in the summary reports Per recent conversations with CDPHE staff, it is appropriate for DOE to requests formal concurrence that these IHSS Groups be agreed to as No Further Accelerated Action Sites, referred to in previous documentation as NFA sites The recently obtained information and NFA determination will be documented in the FY03 HRR

As discussed, future closeout reports and data summary reports will include the request for Agency NFA concurrence upon approval of the report This should help to streamline and eliminate duplicate paperwork in moving forward with closure of the RFETS

Thank you for your support in this issue Attached for your convenience is a draft letter for submittal to the CDPHE and EPA If you have any questions please Marla Broussard of my staff at (303) 966-6007
