November 3, 1989

Mr. Gale Wright, Chief
Remedial Section/Superfund Branch
U. S. Environmental Protection
Agency
Region VII
726 Minnesota Avenue
Kansas City, Kansas 66101

Dear Mr. Wright:

MODIFICATION TO THE CONTAINERIZED CHEMICALS ENGINEERING EVALUATION/COST ANALYSIS (EE/CA)

The original containerized chemicals Engineering Evaluation/Cost Analysis (EE/CA) package stated that the RCRA waste, which could not be released off site, would be stored in Building 406. Since that time, it has been determined that a larger storage area is needed. Therefore, the purpose of this letter is to amend the EE/CA to show that the RCRA waste will be stored in Building 434.

Building 434 is undergoing modifications to meet RCRA storage requirements. Modifications should be completed by the end of 1989 and at that time, the contents of Building 406 will be moved.

This letter is to advise you of the modification to the containerized chemicals EE/CA. Please contact Ken Lawver if you have any questions.

Sincerely,

K. A. Lawver
