Proposed Plan and Draft Modification to the Colorado Hazardous Waste Permit for Rocky Flats Environmental Technology Site Preferred Alternative for Operable Unit 15

The U.S. Department of Energy (DOE) has released the Proposed Plan and Draft Modification to the Colorado Hazardous Waste Permit for Rocky Flats Environmental Technology Site for closure of Operable Unit 15, Inside Building Closures.

The plan describes proposed actions associated with closing small areas inside large buildings where hazardous wastes were previously stored or treated. This plan recommends clean closure under the Resource Conservation and Recovery Act.

The Environmental Protection Agency and the Colorado Department of Public Health and Environment, working with DOE, will make the final decision on the closure, including a Hazardous Waste Permit Modification, only after regulatory agency and public comments are considered.

Public Comment Period
May 17, 1995 to July 17, 1995

A public hearing to receive comments on the plan will be held at the June Environmental Restoration Quarterly Public Meeting.
