To: Mr. W. H. Pennington,
Director Office of NEPA
Coordination
U. S. Department of Energy
Mail Station E-201
Washington, D. C. 20545

00357

Sir:

In light of the up-coming Public Hearing concerning the May 24th draft of an Environmental Impact Statement on Rocky Flats nuclear weapon plant 16 miles north of Denver I must relay this critical information to you on (3) seismology of the area.

As you are well aware of sometimes one Federal governmental department does not know of the research or activities of another department.

Question: Is the department of Energy aware of the astrophysics Book entitled "The Jupiter Effect" - written on the subject of the effect of sunspots on weather on Earth's rotation due to planetary gravitational pull on the sun which may result in the triggering of fault lines around the world ??? during 1982 ±

N.A.S.A. has taken the book seriously by launching a satellite specifically to monitore - (watch) sun spot activities.

I hope the Department of Energy checks this information out in light of the fact that there are fault

lines in Golden Colo.
The C.I.A. may be keeping the lid on this info because of the potential for upsetting the Public "world".
I know that the Defense Department and C.I.A. have high interest in keeping Rocky Flats - but if NASA scientist are right with their sunspot data - Rocky Flats is in damage seismologically.
Please contact N.A.S.A. at once to clear up this matter.
I can not convey the importantsy this matter in this letter.
Personally I have given up a medical - scientific career to go to jail for non-violent action - "civil disobedience" to stop - "convert" Rocky Flats to non-nuclear weapons - I.e. non plutonium.
If I was not going to be in jail I would testify on the 24th in suit & tie with documents - But we all have our roles.
- again don't believe me - check with N.A.S.A. on the "Jupiter Effect" and their satellite watching sun spot activity.

P.S. sorry for the pen & paper - just heard about the hearing data deadline - had to get this off - good luck with contacting N.A.S.A.

Sincerely Yours
Gary Wooller
