Dr. A. E. Schuh
Director of Research
U. S. Pipe and Foundry Company
Burlington, New Jersey

Dear Dr. Schuh:

This is to acknowledge receipt of report dated April 6, 1944, by Alfred Boyles on "Centrifugal Casting of Tubes from Beryllium-Aluminum Alloy". This report includes definite recommendations of methods for casting beryllium tubes and thus accomplishes the result which we undertook to attain. I feel that you and Mr. Boyles have done an excellent job and are to be congratulated on the development of a successful method.

Although this report is entitled "Progress Report" your letter indicates that it marks the termination of experimental work on the problem and I am therefore recommending that it be accepted as a final report on our contract.

Confirming my instructions to you by telephone this is to authorize you to ship six lengths of cast tube to Battelle Memorial Institute, attention: Dr. H. W. Russell, for welding tests. The balance of cast tubes, crude metal, turnings, skulls, etc., should be shipped to Armory Delivery, 5200 Cottage Grove, Chicago, Illinois, marked for my attention.

I trust that I shall have the pleasure of seeing you again in the near future.

Very truly yours,

TECHNICAL DIVISION
J. Chipman, Assoc. Director
