New York, New York.

The Area Engineer
[illegible] Engineer District
Box 42, Station E.,
Rochester, N.Y.

Attention: Mr. Julian Levy, President.

Gentlemen:

With further regard to our letter of 25 October 1943 (NEW C-113-c.MH) in connection with the grinding and sampling of the material in Lots Nos. 1R, 2R, 3R, 4R, 5R, 6R and 7R, please be advised that the sampling of Lots 2R and 4R and the grinding and sampling of Lots 3R and 7R have now been completed. No doubt you have already been advised of this fact by your representative in this matter, Lidoni and Company.

Lots 6R and 7R

As you were advised in letter referred to above, Lot 1R was shipped from the point of storage to the YOA plant at Bridgeville, Pa. for grinding on 22 October 1943. This lot has now been ground and transported to the Vitro Manufacturing Company plant at Canonsburg, Pa. The grinding of Lot 2R is in progress at the present time at Bridgeville, this lot having been forwarded from the point of storage to Bridgeville on 20 November 1943. Lot 5R is now in transit from the point of storage to Bridgeville for grinding, this lot having been forwarded from the point of storage on 25 November.

According to the original plan as set forth in letter first referenced above, Lots 1R, 2R and 5R will be transported to Canonsburg as each increment thereof is ground. These three lots will be sampled at the same time at Canonsburg.

It is anticipated that sampling of lots 1R, 2R and 5R will take place some time during the period of 10-15 December. You will be advised later when this date is definitely known.
