Gentlemen:

GENERAL ATOMIC THORIUM STOCKPILE - DONATION TO DOE

Confirming our discussion of May 8, 1979, please proceed with preliminary planning for movement of the subject material from General Atomic's storage facility in Youngsville, North Carolina to the FMPC. This planning should include arrangements for loading the material at the storage site, transportation to the FMC, and storage at the FMPC. We expect to receive funding (\$75,000) for this activity in the June 1979 financial plan. Upon receipt of funding, we will authorize you to initiate movement of the material.

You were previously furnished a copy of General Atomic's letter of April 25, 1979, which provides information concerning the subject material. Enclosed herewith are photographs which were taken at the storage site early April 1979.

Your cooperation in this matter is appreciated.

Sincerely,

H. D. Hickman
H. D. Hickman, Director
Manufacturing Division
