ATTN OF:

SUBJECT: Authorization for Remedial Action at the Former Associate Aircraft Site in
Fairfield, Ohio

TO: W. Seay, DOE Oak Ridge Field Office

The former Associate Aircraft Tool and Manufacturing, Inc., site at 3660 Dixie Highway, Fairfield, Ohio, is designated for remedial action under the Formerly Utilized Sites Remedial Action Program (FUSRAP). Force Control Industries is the current occupant of the site. This designation is based on the results of radiological surveys and conclusions from an authority review. Copies of the radiological survey reports and the authority review are provided for information.

The site has been assigned a low priority under the FUSRAP protocol. The surveys concluded that the property contains residual radioactive contaminants that exceed current guidelines on the floor, on some roof support beams, in the drains, and in a few outdoor areas. At least one uranium fire occurred at the site during production operations. Under present use conditions, the contamination does not present a significant health risk to occupants of the building. Because of the limited extent of contamination, we recommend that remediation of the site follow the expedited FUSRAP protocol now under development for removal actions.

The effect of this designation on the FUSRAP baseline should be evaluated, documented, and submitted for approval under baseline change control procedures.
