RE: RFLMA dated December 6, 2006	
The City and County of Broomfield is providing comments to the Rocky Flats Legacy Management Agreement. As a downstream community that has been involved with Rocky Flats since the early 1970's, Department of Public works will continue to be intimately involved with post-closure activities. The Department of Public works thanks the US Department of Energy (DOE), the US Environmental Protection Agency (EPA), and the Colorado Department of Public Health and Environment (CDPHE) for the open door policy with the community and other governments downstream of Rocky Flats.

Present Landfill Monitoring & Maintenance Plan Post-Closure Plan, U.S. DOE RFS

Present Landfill Monitoring & Maintenance Plan Post-Closure Plan, U.S. DOE, Rocky Flats Site. This Monitoring and Maintenance Plan and Post-Closure Plan (M&M Plan) applies to the Present Landfill (PLF) (HISTORICAL Individual Hazardous Substance Site [IHSS] 114) at the Rocky Flats Site). This PLFM & M Plan is modification of the original PLFM & M Plan, approved in May 2006.

RE: RFLMA Contact Record 2008-01

The Colorado Department of Public Health and Environmental (CDPHE) has reviewed RFLMA Contact Record 2008-01, which reports the surface water and sediment sampling done in support of the requirements in the Rocky Flats Legacy Management (RFLMA). The Contact Record concludes that no further sampling is necessary to meet the RFLMA requirements. CDPHE has conferred with Region 8 on the Environmental Protection Agency and approves this contact Record.

RE: RFLMA Contact Record 2008-05	
The Colorado Department of Public Health and Environmental (CDPHE) has reviewed RFLMA Contact Record 2008-05, which documents consultation regarding instances of concentrations of certain analytes that are greater in RCRA wells downgradient of the OLF than in the upgradient RCRA well. The supplemental analyses and comparisons provided are sufficient to satisfy the consultation requirements of Figure 10 in RFLMA Attachment 2. Monitoring the OLF RCRA wells will therefore continue and additional consultation regarding these specific circumstances will be required only if future trending analyses indicate trend. CDPHE approves this contact record without modification.

Construction of Collection Sump for SPPTS

The Solar Ponds Plume Treatment System (SPPTS) includes a groundwater intercept trench from which groundwater is pumped into cell for treatment. Remnants of the upgradient (generally south and southwest) portions of the interceptor Trench System (ITS) in the vicinity of the former Solar Evaporation Ponds continue to collect contaminated groundwater and feed it to the SPPTS groundwater intercept trench. Remnants of the SPPTS intercept trench are also present to the side downgradient (generally east and northeast) of the SPPTS intercept trench; water collected by this portion of the ITS is not treated by the system.

Second Five-Year Review Report for the RFS Jefferson and Boulder Countries, Colorado	
The Second Five-Year Review Report for Rocky Flats Site Jefferson and Boulder Counties, of Colorado. The U.S. Department of Energy's (DOE's) Office of Legacy Management (LM) has conducted a second five-year review of remedial actions implemented at the Rocky Flats Site (RF). Because remaining contamination in portions of Rocky Flats do not allow for unlimited used and unrestricted exposure, periodic reviews are required by law to be conducted at least every five years to determine whether remedial actions remain protective of human health and the environment.

Operations and Maintenance Plan for RF Surface Water Control Project Book 2 of 4	
The Rocky Flats Site (RF) is under the jurisdiction of the U.S. Department of Energy (DOE) Office of Legacy Management (LM). Long-term surveillance and maintenance activities at Rocky Flats are conducted under the Legacy Management Support contract by S.M.Stoller Corp. Operation and management of the site surface water dams are performed as part of the surveillance and maintenance activities implemented at Rocky Flats, which include activities conducted pursuant to the Rocky Flats Legacy Management Agreement (RFLMA)(DOE 2007).

Revision of Sampling locations to reflect Site Reconfiguration	
Two monitoring locations identified in the RFLMA warrant revision. 1. Sentinel well TH046992 is located in the Center of Dam B-3. This well will be abandoned as part of the upcoming dam breach project, following routine RFLMA-required sampling for the fourth calendar of 2008. It is proposed that well TH046992 be abandoned as required, but not replaced; and that RFLMA monitoring continue unchanged at nearby wells 95099 and 23296.

RE: RFLMA Contact Record 2008-09	

The Colorado Department of Public Health and Environmental (CDPHE) has reviewed Contact Record 2008-09, which propose modifications to two monitoring locations. These proposals comply with the Rocky Flats Legacy Management Agreement and are consistent with previous consultations with CDPHE and this contact record is therefore approved. As stated in the contact record, corresponding changes will be made to Attachment 2 of RFLMA the next time the document is modified.

Delivery of 2008 Wetland Mitigation Monitoring Report for the Rocky Flats Site	
Delivery of 2008 Wetland Mitigation Monitoring Report for the Rocky Flats Site. During cleanup and closure activities at the Rocky Flats Site (Sites), several wetland areas were disturbed. The Site Wetland Mitigation Monitoring and Management Plan (WMMMP:June 2006) was written to address the mitigation and monitoring of these effects on the wetlands.

RE: Screening Level Evaluation for RF Solar Ponds Plume Treatment System Upgrades	
The Colorado Department of Public Health and Environment (CDPHE) has reviewed the above referenced Screening Level Evaluation. The evaluation was performed in response to concerns about treatment system additives proposed in RFLMA Contact Record 2009-01 and their potential effects on surface water quality. The information provided in the evaluation sufficiently addresses those concerns and the evaluation is approved as an addendum to Contact Record 2009-01.

Rocky Flats Site Third Quarter Calendar Year 2009 Report of Site Surveillance and Maintenance Activities

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) is responsible for implementing the final response action selected in the Final Corrective Action Decision/Record of Decision (CAD/ROD) (2006a) issued September 29, 2006, for the Rocky Flats Site (the Site). DOE, the U.S. Environmental Protection Agency, and Colorado Department of Public Health and Environment (CDPHE) have chosen to implement the monitoring and maintenance requirements of the CAD/ROD as described in the Rocky Flats Legacy Management Agreement (RFLMA) (DOE 2007a).

U.S. DOE posted two presentations and a Contact Record to Rocky Flats LM	
The Overview of the 3rd Quarter 2009 Surveillance and Maintenance Report is located at < http://www.lm.doe.gov/Rocky_Flats/Documents.aspx > on the Site Documents Page. An Introduction on the Rocky Flats Surface Water Configuration Environmental Assessment (EA) is located on the Community Involvement page at < http://www.lm.doe.gov/Rocky_Flats/Sites.aspx?view=5 >. This presentation outlines the process for evaluating the impacts related to breaching dams and restoring the approximate strem configurations for creek traversing the Rocky Flats Site. The public is invited to view and discuss presentations on Monday 1, 2010 at 9 a.m. at the Rocky Flats Stewardship Council quarterly meeting, located at the Rocky Mountain Metroplitan Airport Terminal Building, 11755 Airport Way, Broomfield, Colorado. Contact Record RFLMA cr 2010-01, which addresses targeted soil sampling at the Original Landfill (OLF) to evaluate contaminations levels in relation to the Colorado Department of Public Health and Environment's (CDPHE) August 2008 Policy, End of Post-Closure Care, is located at < http://www.lm.doe.gov/Rochy_Flats/ContactRecords.aspx >, or by clicking on Contact Records on the Coummity Involvement page.

RE: RFLMA Contact Record 2010-01	
The Colorado Department of Public Health and Environment (CDPHE) has reviewed RFLMA Contact Record 2010-01, which proposed additional sampling at the Original Landfill in anticipation of eventual reductions in monitoring and maintenance schedules. Aspects of this sampling will be proposed for approval in a subsequent sampling and analysis plan. All the elements required by the Rocky Flats Legacy Management Agreement for a project of this type are adequately addressed and the contact record is therefore approved.

Delivery of 2009 Wetland Mitigation Monitoring Report for the Rocky Flats Site	

During cleanup and closure activities at the Rocky Flats Site (Site), several wetland areas were disturbed. The Site Wetland Mitigation Monitoring and Management Plan (WMMMP:June 2006) was written to address the mitigation and monitoring of these effects on the wetland. One of the requirements of the WMMMP is to produce an annual report the summarizes the monitoring data and management actions and issues from the previous field season. Because of the large number of monitoring photographs that the report includes, it is in a completely electronic format. The report is set up on a website on the enclosed DVD. To access the report, put the DVD in a DVD drive, and open windows Explorer. Double-click on the file the report , called "START HERE 2009 Wetland Mitigation Report DVD.htm".

Non-Rocky Flats Legacy Management Agreement (RFLMA) Surface Water Monitoring Project for North and South Walnut Creeks

On January 18, 2010, DOE and CDPHE staff consulted regarding planned non-RFLMA surface water monitoring at various locations and the rationale for performing this monitoring. It was agreed that this monitoring does not require approval under RFLMA and that a Contact Record would be prepared to outline the monitoring project. The parties verbally concurred that the monitoring could proceed

RE: RFLMA Contact Record 2010-03

The Colorado Department of Public Health and Environment (CDPHE) has reviewed RFLMA Contact Record 2010-03, which proposed non-routine surface water sampling to provide additional temporal and spatial water quality data. Although this surface water monitoring is not required by RFLMA, it conforms to RFLMA protocols and contact record is approved.

RE: RFLMA Contact Record 2010-02	
The Colorado Department of Health and Environment has reviewed the draft Contact Record 2010-02. This contact record allows excavations that would breach all the remaining dams in the Central Operable Unit. This action is acceptable for the same reasons that earlier breaching actions were acceptable; i.e., their presence is not a requirement of the remedy and removal of the ponds provides several advantages that further the environmental restoration at the site. This proposed action is in accordance with our regulatory requirements and guidance and this contact record is therefore approved.

New Rocky Flats Documents Posted to DOE Website	
The U.S. Department of Energy has posted the "Overview of the 2009 Rocky Flats Annual Surveillance and Maintenance Report" to the Site Documents page of the Rocky Flats Legacy Management website at < http://www.lm.doe.gov/Rocky_Flats/Documents.aspx >. The overview of the annual report will be presented to the public at the Rocky Flats Stewardship Council quarterly board meeting that on Monday , June 7, 2010 in the Mount Evans room of the Mountain Metropolitan Airport Terminal Building, 11755 Airport Way, Broomfield, Colo. The DOE presentation is scheduled to begin at 9:15 a.m.

RE: Original Landfill Sampling and Analysis Plan (April 2010)	
The Colorado Department of Public Health and Environment(CDPHE) has reviewed the Original Landfill Sampling and Analysis Plan, which describes additional sampling at the Original Landfill. This plan provides sufficient detail of the proposed sampling effort and conforms to the previously approved RFLMA Contact Record 2010-01. The Plan is therefore approved

Offsite Well Abandonment at the Former Rocky Flats Plant	
This correspondence is in reference to one existing monitoring well that was installed in the 1990s off of the Rocky Flats plant property. The well is located adjacent to the eastern side of Stanley Lake as illustrated in the attached map. The well is not useful to the Rocky Flats Site and is scheduled to be abandonment in accordance with regulations set forth by the State of Colorado. The abandonment of said well will commence unless written objection from the City of Westminster is received by the Department of Energy Office of Legacy Management within 30 days of the date of this letter.

RE: Abandonment of Groundwater Monitoring Wells-Great Western Reservoir Open Space	
The City and County of Broomfield (Broomfield) has reviewed your correspondence dated May 13, 2010 regarding the proposed abandonment of three groundwater monitoring wells within Broomfield's Great Western Reservoir Open Space area. Broomfield as the property owner where the existing wells are located, objects to the abandonment of the well due to the limited amount of information provided with your correspondence. However, Broomfield will allow the abandonment to proceed subject to the Department of Energy Office of Legacy Management obtaining a Public/Private Improvement Permit.

Draft CR 2010-06 SW027 - Rev 1 tech edits Rev 1 DRAFT RFLMA CR 2010-06 Monitoring Results at SW027

I sent out a Draft CR last Friday before getting the tech editor's comment back. She picked up a few mistakes (e.g., you probably noted in paragraph at top of page 3, word "continuation" instead of "contamination"), so I've fixed those and also adopted some of her suggested edits for clarity in this revised Draft. Based on the feedback on the Draft Contact Record 2010-04 for the proposed monitoring point changes, I also edited this Draft CR to replace references to "compliance values" with "12 month rolling average".

Overview of the first quarter 2010 surveillance and maintenance report for the Rocky Flats Site posted on the DOE website

The U.S Department of Energy has posted the "Quarterly Report of Site Surveillance and Maintenance Activities - First Quarter Calendar Year 2010" on the Rocky Flats Legacy Management Site Documents webpage at <http://www.lm.doe.gov./Rocky_Flats/Documents.aspx>. This overview will be presented during the Rocky Flats Site Quarterly public meeting hosted by the Rocky Flats Stewardship Council on Monday, Sept. 13, 2010. The Stewardship Council meeting begins at 8:30 a.m. at the Rocky Mountain Metropolitan Airport, Terminal Building, Mount Evans Room, 11755 Airport Way, Broomfield, Colorado. The DOE presentation of the quarterly report is scheduled to begin at 9:45 a.m.

RE: New Surface Water Monitoring Sites

Thank you for providing us with an update and a follow-up to our meeting on August 25, 2010. Based on our telephone conference call yesterday, it is my understanding that you are ready to issue a notice to proceed to your contractor for constructing two new surface water monitoring sites. These new sites coincide with the same locations that are contemplated in the proposed revisions to the Rocky Flats Management Agreement (RFLMA), except they will not be designated as Points of Compliance (POC) at this time.

RE: Dam Breaching and Points of Compliance issues

Yesterday, CDPHE met with representatives of four downstream cities: Broomfield, Northglenn, Thornton, and Westminster. The intent of the meeting was to allow senior officials from our department to meet with elected officials of the cities to hear and understand their concerns. We also wanted the cities to better understand regulatory framework we have for decision making regarding these issues.

RE: Request for Extension to the Public Review and Comment Modification to Monitoring Location

Request for Extension to the Public Review and Comment Period for Proposed Modification to Monitoring Location at the Rocky Flats, dated July 20, 2010. The U.S. Department of Energy (DOE), the U.S. Environmental Protection Agency (EPA) and the Colorado Department of Public Health and Environment (CDPHE) released a proposed modification to the Rocky Flats Legacy Management Agreement (RFLMA) Attachment 2, Legacy Management Requirements, for public review and comments. The public review period for these changes was extended from the initial proposed end date of August 27, 2010 to September 28, 2010.

Rocky Flats - Broomfield letter of August 5, 2010

Thank you for your letter of August 5, 2010, to the Secretary of Energy. As part of our ongoing public outreach program, the U.S. Department of Energy (DOE) Office of Legacy Management (LM) welcome input from neighboring cities and other interested parties regarding our stewardship of legacy management sites. As the Director of the Office of Site Operations within LM, I have authority for the Rocky Flats Site (RFS) and have been assigned to respond to your letter.

RE: RFLMA Contact Record 2010-02	
The Colorado Department of Public Health and Environment approved RFLMA Contact Record 2010-02 on April 15, 2010. In the interim the surrounding communities have raised concerns, including the potential violation of Institutional Control #2, as documented in the CAD/ROD and the Environmental Covenant. In addition, the schedule for implementing action that would require this approval is years in the future. In light of these considerations, our approval of Contact Record 2010-02-is withdrawn.

PD-A-000312	11/2/2010
Monitoring Results and Water Treatment at the MSPTS	
Treatment of contaminated groundwater by the MSPTS and ETPTS results in removal of the vast majority of contaminantion load from influent groundwater. Treatment does not result in complete removal of all groundwater contaminants, however, and low concentrations of few volatile organic compounds (VOCs)remain in system effluent at levels that are above RFLMA Attachment 2, Table 1 standards.

RE: RFLMA Contact Record 2011-01

The Colorado Department of Public Health and Environment has reviewed RFLMA Contact Record 2011-01, which details actions to reduce effluent concentrations of residual volatile organic compounds (VOCs) from Mound Site Treatment System. It also covers routine maintenance to replace the ZVI media at this treatment system. Because these actions are within the scope of the remedy prescribed in the CAD/ROD and they meet regulatory requirements, this contact record is approved. Region 8 of the Environmental Protection Agency has also reviewed this contact record and concurs with its approval. If this action is unsuccessful or additional actions are needed to further reduce VOC concentrations in groundwater, then further consultation is required. Please let me know if you have any questions regarding this approval.

Replace Sentinel well 33703	
The casing is kinked in sentinel well 33703, which monitors groundwater within the buried drainage south of former B371 and downgradient of former Oil Burn Pit #1. The drainage was filled and graded for construction of the parking lot for the former pacs-2. The kink has gradually worsened, and the well now requires replacement

RE: RFLMA Contact Record 2011-02	
The Colorado Department of Public Health and Environment has reviewed RFLMA Contact Record 2011-02, which describes the need to abandon Sentinel Well 33703 and the method for installing Well 33711 to replace it. This action supports the remedy prescribed in the CAAD/ROD and this contact record is therefore approved.

RE: RFLMA Contact Record 2011-03

The Colorado Department of Public Health and Environment (Department) has reviewed RFLMA Contact Record 2011-03, which documents consultation between the Department and the U.S. Department of Energy regarding evaluation of uranium and boron in groundwater at the Original Landfill and the Present Landfill. As stated in this contact record, evaluation of these analytes will subsequently be documented in RFLMA Annual Reports rather than in contact records, unless future consultation becomes necessary.

PD-A-000348	4/25/2011
Purpose: Resource Conservation and Recovery Act (RCRA) Well Monitoring Results at Original Landfill (OLF) and Present Landfill (PLF)	
Groundwater monitoring results were reviewed in accordance with Rocky Flats Legacy Management Agreement (RFLMA) requirements and for the preparation of the 2010 RFLMA Annual Report. The results of statistical evaluations of analytical data from the OLF and PLF RCRA wells required consultation among the RFLMA Parties. This contact record documents specific results driving the need for consultation. More detailed information will be provided in the 2010 Annual Report.

DOE LM Rocky Flats Site notification of a reportable condition at RFLMA Point of Evaluation GS10

This notification is to inform you of a reportable condition under RFLMA Attachment 2, Section 6.0, Action Determinations, at the RFLMA Point of Evaluation, GS10. A reportable condition was determined of the most recently available validated analytical results for uranium from the composite sample collected during the period 4/11/11 1:50 - 5/4/11 11:39. The result for this sample was 71.0 ug/L total uranium. Validated results were received on 6/14/2011.

FW: AMP Group notification of a reportable condition at RFLMA Point of Evaluation GS10	
In AMP Group notification of a reportable condition at RFLMA Point of Evaluation GS10 we asked for your availability the first week of July in order to schedule and AMP Group meeting to discuss the reportable condition. So far I've received only three responses, with Thursday July 7, being the common availability. Please respond if that day works for you or if you would prefer to postpone until another week. If so, please suggest several available dates so that I can schedule a meeting.

RE: Draft Contact Record 2011-04

The AMP makes clear that the RFLMA process takes precedence. Now that we also have AMP group conversation piece, and difficulty in setting up mutually agreeable meeting time, ect., it is best not to wait for the AMP group input before informing public of what we are doing to address condition. We can factor in AMP group feedback when timely enough to inform the RFLAM consultative process.

U.S. Department of Energy Office of Legacy Management National Environmental Policy Act Environmental Checklist

The cleanup and closure of RFS was completed via a cleanup agreement under CERCLA, a Compliance Order on Consent under the Resource Conservation and Recovery Act (RCRA), and the Colorado Hazardous Waste Act (CHWA). The final response action for RFS is specified in the final Corrective Action Decision/Record of Decision (CAD/ROD) FOR Rocky Flats issued on September 29, 2006. Implementation of the final respnose action is regulated under the Rocky Flats Legacy Management Agreement (RFLMA).

RE: Rocky Flats Proposed Plan Comments

The City of Thornton (Thornton) submits the following comments for consideration by the Department of Energy (DOE), Colorado Department of Public Health and Environment (CDPHE), and the Environmental Protection Agency (EPA) in the final decision regarding the Proposed Plan for Amendment of the Corrective Action Decision/Record of Decision (CAD/ROD) for the Rocky Flats site. In addition, as a member of the Woman Creek Reservoir Authority (Authority). Thornton fully endorses the comments, concerns and requests of the Authority regarding the proposed amendments.

CAD/ROD of the Rocky Flats Environmental Technology Site

To Whom It May Concern: I would like to register my strong opposition to the currently Amendments to the CAD/ROD for the Rocky Flats Environmental Technology Site. Public comment must be sought in the event that any of the institutional controls for the agreement are amended. Specifically, in the event that there are any proposals to disturb the soil below 3 feet, public comment must be considered

WRC Written Comments on June 3, 2011 Proposed Plan to Modify the Rocky Flats CAD/ROD

The Woman Creek Reservoir Authority (WCRA), comprised of representatives from the Cities of Westminster, Thornton, Northglenn, has serious concerns about the DOE Proposed Plan to amend the Rocky Flats Corrective Action Decision/Record of Decision CAD/ROD institutional controls (IC). WCRA believes the proposed changes go beyond the DOE-stated need to allow for implementation of the remedy and site maintenance activities.

Draft CR 2011-07 112911	
Here is a update DRAFT CR which incorporates some minor edits suggested by tech, editor, and has updated to the infrastructure - table 7 bollards around the pezos will be remove at PLF vs. 3 in the 11/23 DRAFT; and clarifies that about 60 feet of the toe drain at A3 Dam will be removed from the notch (i.e, that about the amount that will be uncovered in the notch area), not 60 feet from the north and 60 feet from the south pipe.

RE: RFLMA Contact Record 2011-07- Pond A-3 and Present Landfill Dam Breach Project	
The Colorado Department of Public Health and Environment (Department) has reviewed Rocky Flats Legacy Management Agreement (RFLMA) Contact Record 2011-07 in consultation with Region 8 of the Environmental Protection Agency. The Department has further determined that the propose activity will not result in a unacceptable release or exposure subsurface contamination, and will not damage any component of the remedy. The Department therefore approves Contact Record 2011-07 and the Soil Disturbance Review Plan attached to it.

RE: RFLMA Contact Record 2011-08	
The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency, has reviewed Rocky Flats Legacy Management Agreement (RFLMA) Contact Record 2011-08. This contact record accurately and sufficiently documents the consultation provided by the US Department of Energy and its contractor with regards to the reportable conditions at GS10 due to elevated concentrations of americium. The Department finds the plan and schedule to address the reportable condition consistent with the process in RFLMA Attachment 2 and therefore approves Contact Record 2011-8.

Delivery of 2011 Wetland Mitigation Monitoring Report for the Rocky Flats Site	
During cleanup and closure activities at the Rocky Flats Site (Site), several wetland areas were disturbed. The Site Wetland Mitigation Monitoring and Management Plan (WMMMP: June 2006) was written to address the mitigation and monitoring of these effects on the wetlands. One of the requirements of the WMMMP is to produce an annual report that summarizes the monitoring data and management action and issues from the previous field season.

U.S. Fish and Wildlife Service Endangered Species Act of 1973

Based on the authority conferred to the U.S. Fish and Wildlife Service (Service) by the Endangered Species Act of 1973 (ESA), as amended (16 U.S.C. 1531 et seq.), the Service reviewed the December 21, 2011, Preble's Mouse Mitigation Monitoring Report for the Programmatic Biological Opinion at the Rocky Flats Site, 2011 Annual Report. The report was written to fulfill requirements of our biological opinion regarding the impacts of Site closure on habitat for the threatened Preble's meadow jumping mouse, *Zapus hudsonius preblei*. You requested concurrence from us that monitoring at site M, the East Shooting Range Remediation Project, is complete. We received the letter via email on February 7, 2012.

RE: RFLMA Contact Record 2012-02	

The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency (EPA), has reviewed Rocky Flats Legacy Management Agreement (RLAMA) Contact Record 2012-02. This contact record is consistent with the consultation with the Department and EPA, which occurred on October 16, 2012. Improving treatment at the East Trenches Plume Treatment System as proposed in this contact Record supports the objectives of the RFLMA. The Department therefore approves Contact Record 2012-02.

Contact Record Approval 10/25/12

Treatment of contaminated groundwater by the ETPTS results in the removal of the vast majority of the volatile organic compound (VOC) contamination load from the influent groundwater. But treatment typically does not result in complete removal of VOCs and a few VOCs remain in the ETPTS effluent at levels above Rocky Flats Cleanup agreement (RFLMA) surface water standards in RFLAM Attachment 2, Legacy Management Requirements, Table 1, Surface Water Standards.

DOE has posted a new contact record regarding improvements to groundwater treatment at Rocky Flats

The U.S. Department OF Energy has posted a new contact record the summarizes the consultation between the Rocky Flats Legacy Managment Agreement project coordinators on adding an air stripping component to the East Trenches Plume Treatment System to increase the amount of volatile organic compounds removed from groundwater. The RFLAM project coordinators represent DOE Legacy Management, Colorado Department of Public Health and the Environment and U.S. Environmental Protection Agency. Contact record RFLMA CR 2012-02 is located at

East Trenches Plume Treatment System Air Project Biological Opinion Response

The DOE Office of Legacy Management's Westminster Office received the draft Biological Opinion from the U.S. Fish and Wildlife Service for the East Trenches Plume Treatment System Air Stripper Project via e-mail on November 26, 2012. During our review of the document, we focused specifically on the " Consultation History", " Baseline", "Effects", and "Incidental Take Statement (Terms and Conditions)" sections. As requested, we have made a few comments and minor editorial changes (see enclosure). If these comments and changes are acceptable, DOE accepts the document and terms and conditions in the Biological Opinion

RE: RFLMA Contact Record 2012-03

The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency (EPA), has reviewed Rocky Flats Legacy Management Agreement (RFLMA) Contact Record 2012-03. This contact record is consistent with consultations with the Department and EPA, which occurred on October 16, 2012. The minor modifications RFLMA Attachments 1 and 2 proposed in this contact record accurately update and align RFLMA events that have occurred since its last modification. The Department therefore approves Contact Record 2012-03

PD-A-000498	5/2/2013
--------------------	----------

Contact Record 2013-01 - GS10 Flume Replacement project and Soil Disturbance Review Plan

The flume for Rocky Flats Legacy Management Agreement (RFLMA) Point of Evaluation (POE) monitoring location GS10 in South Walnut Creek was originally installed in 1993. DOE considered replacing the GS10 flume in 2000, when it replaced flumes for several other monitoring locations, but it was a low priority in relation to other cleanup and closure work at the time. The new surface water configuration resulting from breaching the dams for former retention ponds B-1, B-2, B-3, and B-4 in 2009 now allows DOE to propose replacing the GS10 flume and to move its location slightly downstream.

Revisions to the Surface Water Configuration AMP

Comments from the City and County of Broomfield regarding the revised May 2012 Adaptive Management Plan (AMP). "Due to the short timeframe allotted to provide comments to the revised May 2013 Adaptive Management Plan, I am sending some comments to you and will follow-up with a formal letter. The initial date on the approved AMP was June 2011 and per the AMP process we were to reevaluate the plan every two years. The intent of the evaluation was to evaluate data generated by the AMP sampling plan the data per Rocky Flats Legacy Management Agreement (RFLMA) requirements."

RE: RFLMA Contact Record 2013-02 Approval	
The Colorado Department of Public Health and Environment(Deaprtment), in coordination with Region 8 of the Environmental Protection Agency Agency(EPA), has reviewd Rocky Flats Legacy Management Agreement(RFLMA)Contact Record 2013-02. This contact record describes damage to the cover cause by recent stroms, which constitutes a reportable condition. The Department agrees that the initial actions taken to repair the damage meet the objecteive and rationale of Institutional Control (IC) 6. The department therefore approves Contact Record 2013-02 along with its schedule for a proposed evaluation. That evaluation may result in additional proposed action being submitted for approval.

Soil Disturbance Review Plan (SDRP) for Regrading the East Perimeter Channel (EPC) and Associated Diversion Berms at the Original Landfill (OLF)	
Rocky Flats Legacy Management Agreement (RFLMA) Contact Recprd (CR) 2013-02 documents the outcome of consultation between the DOE, CDPHE and EPA (the RFLMA parties) regrading DOE's response to localized distress cracking conditions on the OLF soil cover. These conditions were noted aftr the heavy precipitation event along the Front Range of Colorado from September 9 through September 16, 2013.

RE: Final Grading Plan for the Original Landfill to Address Localized Distress Cracking Reportable Condition	
The Colorado Department of Public Health and Environmental (Department) has reviewed the final grading plan that addresses the reportable condition that currently exist on the Original landfill cover. This grading plan is consistent with the consultationm with the Department, which occurred on November 19, 2013 and with the Soil Disturbance Review Plan attached to Contact Record 2013-03 and therefore approved.

Operation and Maintenance Inspection Conducted by CDPHE

Background. The purpose of this inspection was to observe the methods and procedures for sampling groundwater wells at the Rocky Flats Site. Inspections are required by RCRA inspection national core program requirements for Land Disposal Facilities, which the Colorado Department of Public Health and Environment has agreed to implement in a CDPHE/EPA RCA Hazardous Waste Program Memorandum of Agreement (September 11, 2000). Groundwater sampling is conducted at Rocky Flats according to the general monitoring requirements in Attachment 2 of the Rocky Flats Legacy Management Agreement and the specific sampling criteria in the Rocky Flats Site Operation Guide.

RE: RFLMA Contact Record 2014-01 approval

The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency (EPA), has reviewed Rocky Flats Legacy Management Agreement (RFLMA) Contact Record 2014-01. This contact record describes a plan to reconfigure the East Trenches Plume Treatment System for air Stripper treatment. The Department therefore approves Contact Record 2013-03 so that engineering designs can be developed and required equipment procure.

RE: RFLMA Contact Record 2014-02 approval

The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency (EPA), has reviewed Rocky Flats Legacy Management Agreement (RFLMA) Contact Record 2014-02. As described in the contact record, surface water monitoring locations GS01 and GS03 have not served as point of compliance for more than two years. This contact record is consistent with consultation with the Department and with the final remedy and the Department therefore approves Contact Record 2014-02.

RE: RFLMA Contact Record 2014-03 Approval	
The Colorado Department of Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency (EPA), has reviewed Rocky Flats Legacy Management Agreement (RFLMA) Contact record 2014-03. This contact record directs changes to be made to the Present Landfill Monitoring and Maintenance Plan, which is an enforceable requirement of the RFLMA. This contact record is consistent with consultation with the Department and with the final remedy and the Department therefore approves Contact Record 2014-03. Public notice of these proposed minor modification to this RFLMA attachment is provided by the contact record.

RE: RFLMA Contact Record 2014-07 approval

The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency (EPA), has reviewed Rocky Flats Legacy Management Agreement (RFLMA) Contact Record 2014-07. This contact record describes the proposed abandonment of Sentinel Well 88104. This contact record is consistent with consultation with the Department and EPA, which occurred on June 2, 2014. The Department also concurs that this exception to the decision rule in figure 8 in Attachment 2 of RFLMA is acceptable because of the redundancy of monitoring well coverage in the immediate area. The Department therefore approves Contact Record 2014-07.

PD-A-000603	7/21/2014
--------------------	-----------

Abandonment of Sentinel well 88104 at the Rocky Flats Site, Colorado.

Discussion: Sentinel well 88104 casing is broken within the screened interval approximately 10 feet below ground surface. This well monitors groundwater downgradient of former Building 881 (B881). The broken casing was observed during the second quarter 2014 sampling event, and it was noted that several feet of the well casing has filled with filter-pack sand.

DOE has posted a new Contact Record to the Rocky Flats Legacy Management website	
The U.S. Department of Energy has posted RFLMA CR 2014-09, "Soil Disturbance Review Plan Update for Re-grading the East Perimeter Channel at the Original Landfill", to the Rocky Flats DOE Legacy Management website. This contact record documents the consultation between the RFLMA Parties to address localized cracking and sulmping on the east side of the channel, outside the landfill boundray. Contact Record may be accessed on the Community Involvement page at http://www.lm.doe.gov/Rocky_Flats/Sites.aspx?view=5 .

RE: Modification to the Present Landfill Monitoring and Maintenance Plan

The Colorado Department of Public Health and Environment (CDPHE), in coordination with Region 8 of the Environmental Protection Agency, previously approved Contact Record 2014-03. That contact record outlines minor changes to the Present Landfill Monitoring and Maintenance Plan, which is an enforceable requirement of the Rocky Flats Legacy Management Agreement. These changes eliminate for landfill-specific vegetation monitoring, since the vegetation has met the specified success criteria. Human health and environment continue to be protected under these changes and therefore the modifications are approved.

PD-a-000732	1/5/2015
RE: Contact Record 2014-10	
The Colorado Department of Public Health and Environment (CDPHE) approval Contact Record 2014-10 on December 18, 2014. That contact record addressed a reportable condition for uranium at WALPOC. Internal consultation at CDPHE clarified the applicability of Water Quality Control Commission Regulations No. 31 and No. 38 to surface water exceedance at Rocky Flats. Contact Record 2014-10 included references to the hyphenated state-wide surface water standard for uranium in Regulation No. 31 as part of the rationale for addressing the exceedance. Those references, however, are not consistent with the standards in the RFLMA. Therefore, approval of that contact record is rescinded and DOE is asked to show Contact Record 2014-10 as withdrawn. A new contact record should be drafted to document DOE's response to the exceedance.

PD-A-000733	1/5/2015
Reportable condition for uranium 12 months rolling average at Point Of Compliance WALPOC	
CDPHE rescinded approval of this Contact Record on January 5, 2015. Contact Record RFLMA CR 2015-01 replaces this Contact Record. A reportable condition is expected to occur at surface water Point of Compliance (POC) WALPOC at the Rocky Flats Site, Colorado for the period from November 1, 2013, through October 31, 2014. The automated composite sample for the period on October 23-31, 2014, has not been retrieved from the field as of November 19, 2014, because the collected sample volume in the carboy is not of sufficient quantity for analysis.

RE: Contact Record 2015-02

The Colorado Department of Public Health and Environment (CDPHE), in coordination with Region 8 of the Environmental Protection Agency, has reviewed draft Contact Record 2015-02. This contact record provides a Soil Disturbance Review Plan for construction of an upgrade to the photovoltaic power system at the U.S. Department of Energy's (DOE) storage shed. The proposed project meets the rationale and objectives of institutional Control #2 and Contact Record 2015-01 is therefore approved.

Soil Disturbance Review Plan (SDRP) for Storage Shed Photovoltaic Upgrades

This Contact Record concerns proposed upgrades to a storage shed that was constructed around 2001 at the Rocky Flats, Colorado, Site. The shed is on a concrete slab floor, with structural steel wall frames and roof trusses, rigid sidewall, and galvanized metal roofing and siding. A photovoltaic (PV) system at the storage shed provides power to operate overhead garage doors motors and small LED emergency lights. The PV operates with an inverter.

Notification that DOE plans to take immediate action to resolve excessive groundwater flows at the Original Landfill (OLF)

This e-mail is providing notification as required by the Original Landfill (OLF) Monitoring and Maintenance Plan, Section 6.0 Reporting and Contact Information that the Department of Energy plans to take immediate action to resolve excessive groundwater flows under the OLF's East Perimeter Channel and the eastern most edge of the cover. This action is an ongoing effort to resolve the reportable condition identified in the CR 2013-02 Reportable Condition at the Original Landfill (OLF). A Contact Record addressing the consultation with the regulators concerning this action and describing the action taken or planned to be taken will be issued in the near future.

PD-A-000746	5/26/2015
Original Landfill (OLF) Immediate Response to Recent Precipitation	
The past several weeks of precipitation events have led to unusually high groundwater volumes that, have caused portions of the Original Landfill (OLF) particularly in the area of the East Perimeter Channel (EPC)-to subside. This movement is evident over daily to weekly periods and is appearing as surficial cracks, settling (depressions), or rotational slumping. Repairs that have been completed on these features have needed to be repeated multiple times because the ground surface continues to move. These repairs have not been able to keep up with the recent movements.

RE: Contact Record 2015-04: MSPTS reconfiguration design and minor Rocky Flats Legacy Management Agreement (RFLMA) modifications

Our review has determined that the conceptual approach described in the contact record is consistent with discussions among the RFLMA parties and with site visits, and consistent with the final remedy for the Rocky Flats Site. The changes to RFLMA are determined to be minor and do not require public comment. Contact Record 2015-04 is therefore approved. Subsequent approval will be required for the reconfiguration designs and a Soil Disturbance Review Plan as well as actual changes to RFLMA Attachment 2. Please let me know if you have any questions.

Mound Site Plume Treatment System (MSPTS) Reconfiguration Conceptual Approach

The existing MSPTS includes a groundwater collection trench treatment components, and a subsurface discharge gallery. Groundwater collected in the trench gravity flows through two plastic treatment cells (approximately 10 feet in diameter and 11.5 feet tall) filled with zero-valent iron (ZVI) media. The ZVI is obtained from a source in Detroit, Michigan, and is trucked to the site for installation.

Vinyl chloride results from the Present Landfill Treatment System (PLFTS) effluent triggered the consultative process.

As part of the Present Landfill closure, a passive seep interception and treatment system was installed to treat volatile organic compounds (VOCs) in landfill seep water and Groundwater Intercept System (GWIs) water. There are three sources of influent to the treatment system; two GWIS pipe and the Present Landfill seep. Effluent from the treatment system eventually flows to the former Landfill Pound area.

RE: Contact Record 2015-07 - Vinyl chloride in Present Landfill Seep

The Colorado Department of Public Health and Environment (CDPHE), in coordination with Region 8 of the Environmental Protection Agency, has reviewed draft Contact Record 2015-07. This contact record described the U.S. Department of Energy's response to an exceedance of surface water standard (i.e., practical quantitation limits or PQL) for vinyl chloride in the Present Landfill Treatment System effluent. The response included three subsequent monthly sampling events, which led to sampling at the NNGO1 location. Because the results from the sampling at NNGO1 were below the method limit, no further sampling was required.

Notification of Reportable Condition at AOC well 10304

Analytical results for the fourth-quarter 2015 sample collected October 29, 2015 from AOC well 10304, located downgradient of the 903 Pad/Ryan's Pit Plume, were validated on December 1, 2015. The concentration of TCE in this sample was reported at 72 ug/L. The corresponding RFLMA standard is 2.5 ug/L. As discussed in the second-quarter 2015 report, the concentration of the sample collected during that quarter (15 ug/L) also exceeded the TCE standard. Because this fourth-quarter sample represents the second consecutive routine semiannual sample in which concentrations have exceeded a RFLMA standard, in accordance with RFLMA Attachment 2, Figure 7, a reportable condition exists at this AOC well.

PD-A-000777	12/8/2015
Informal Notification of a Reportable Condition as Specified in the Rocky Flats Site Adaptive Management Plan (AMP)	
Analytical results for the fourth-quarter 2015 sample collected October 29, 2015 from AOC well 10304, located down-gradient of the 903 Pad/Ryan's Pit Plume, were validated on December 1, 2015. The concentration of TCE in this sample was reported at 72 ug/L. The corresponding RFLMA standard is 2.5 ug/L. As discussed in the second-quarter 2015 report, the concentration of the sample collected during that quarter (15 ug/L) also exceeded the TCE standard. Because this fourth-quarter sample represents the second consecutive routine semiannual sample in which concentrations have exceeded a RFLMA standard, in accordance with RFLMA Attachment 2, Figure 7, a reportable condition exists at this AOC well.

PD-A-000779	12/7/2015
Contact Record 2015-09 CDPHE Approval Letter	
The Colorado Department of Public Health and Environment (CDPHE), in coordination with Region 8 of the Environmental Protection Agency, has reviewed draft Contact Record 2015-09. This contact record proposes an interim design and implementation plan that will update the Solar Ponds Plume Treatment System (SPPTS) using a new design based on lagoon pilot-scale studies. A new vault will allow continued uranium treatment testing. Because this construction will require excavation subject to Institutional Controls #2 and #3, this contact record provides a Soil Disturbance Review Plan.

PD-a-000780	12/7/2015
Soil Disturbance Review Plan for Solar Ponds Plume Treatment System Interim Configuration	
Contact Record 2015-08, "Solar Ponds Plume Treatment System Interim Design and Implementation," summarizes the Rocky Flats Legacy Management Agreement (RFLMA) parties' consultation and decision to convert the current Solar Ponds Plume Treatment System (SPPTS) Cell 1 and Cell 2 structure (the "Big Box"), which is currently filled with wood chips, mulch, and soil over treatment media consisting of sawdust mixed with zero-valent iron (ZVI) in Cell 1 and pea gravel mixed with ZVI in Cell 2, into a lagoon for the removal of nitrate. Testing for uranium removal approaches will be conducted on a portion of the lagoon effluent. The use of a lagoon to reduce nitrate has been demonstrated in the Phase III pilot-scale lagoon studies. Information on the status of operation and performance of the SPPTS is provided in RFLMA quarterly and annual site surveillance and maintenance reports. RFLMA contact records and site surveillance and maintenance reports are available on the Rocky Flats public website

CDPHE approval letter for Contact Record CR 2015-10	
The Colorado Department of Public Health and Environment (CDPHE), in coordination with Region 8 of the Environmental Protection Agency, has reviewed draft Contact Record 2015-10. This contact record describes the US Department of Energy's (DOE) response to a reportable condition at AOC Well #10304 due to a repeat exceedance of the Rocky Flats Legacy Management Agreement (RFLMA) water-quality standard for trichloroethylene. Once results were validated, DOE informed CDPHE on December 1, 2015.

Regulatory Contact Record CR 2015-10 - Area of Concern Well 10304 Reportable Condition	
Background: The Rocky Flats Legacy Management Agreement (RFLMA) defines several categories of groundwater monitoring wells at the Rocky Flats Site. Of these, Area of Concern (AOC) wells have reportable conditions defined. AOC wells are located within a drainage and downgradient of one or more contaminant plumes and are monitored semiannually to determine whether the plume(s) may be impacting surface water quality. The primary objective of AOC well 10304 is to evaluate groundwater quality adjacent to Woman Creek, downgradient of the 903 Pad/Ryan's Pit Plume.

Community Notification - Notice of Rocky Flats CERCLA Five-Year Review	
<p>The U.S. Department of Energy Office of Legacy Management is conducting the fourth Five-Year Review of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) remedy for the Central Operable Unit (COU) at the Rocky Flats Site. The purpose of the review is to ensure the CERCLA remedy remains protective of human health and the environment. The remedy for the COU consists of institutional and physical controls, incorporating continued monitoring and maintenance. This Five-Year Review report is required to be completed in August 2017.</p>

Contact Record CR 2016-02 - Mound Site Plume Treatment System reconfiguration project Soil Disturbance Review Report and Explanation of Significant Differences	
<p>During the Rocky Flats Legacy Management Agreement (RFLMA) consultation on February 18, 2016, the Colorado Department of Public Health and Environment (CDPHE), the U.S. Environmental Protection Agency (EPA), and the U.S. Department of Energy (DOE) (jointly referred to as the RFLMA Parties) agreed the Mound Site Plume Treatment System reconfiguration project represents a significant change to the Corrective Action Decision/Record of Decision for the Rocky Flats Plant (USDOE) Peripheral Operable Unit and Central Operable Unit, Jefferson and Boulder Counties, Colorado (CAD/ROD) signed September 29, 2006</p>	
PD-A-000799	6/20/2016
CDPHE and EPA approval letter for Contact Record CR 2016-02	
<p>Our review has determined that the proposed soil disturbance required by the construction activity supports the function of the remedy and will not result in an unacceptable release or exposure to residual subsurface contamination . The proposed actions are consistent with consultation among the Rocky Flats Legacy Management Agreement parties. The proposed project also meets the rationale and objectives of Institutional Control #2 and Contact Record 2016-02 is therefore approved.</p>

PD-A-000804	7/28/2016
Regulatory Contact Record CR 2016-03 - Geoprobe Investigation of the Groundwater System Upgradient of the Original Landfill and the Soil Disturbance Review Plan	
Contact Record (CR) 2015-03, May 26, 2015, approved immediate action to address areas of subsidence and the resulting standing water on portions of the surface of the Original Landfill (OLF). This subsidence was caused by several weeks of precipitation in the spring of 2015. (May 2015 has been noted as the wettest May in Colorado's recorded history.) The immediate action was successful in improving drainage of water on the surface of the OLF. In September 2015, CR 2015-06 approved an action to contour the East Perimeter Channel (EPC) and the eastern edge and western side of the OLF to reestablish surface water flow off the OLF cover towards Woman Creek, and lay back a large scarp at the top of the EPC as a short-term action. However, in the spring of 2016, the EPC and some of the surrounding area slumped, but not as significantly as in 2015. Therefore, the slope instability continues as an ongoing issue.
