Date: June 22, 1989

Subject: TELECON WITH BILL KNOLLMAN: MANHOLE 180 SURCHARGE REMEDIATION

To : C. R. Conner  
W. A. Weinreich

The purpose of this memo is to document the June 22, 1989 telephone conversation with Bill Knollman, Bob Conner, and Dick Kasperek. Bill Knollman was informed that the soil analysis was complete and the contamination had been removed. We asked him how he would like the excavation filled. We then discussed and agreed to fill the excavation with clean soil level to the existing contour, seed, cover with straw, and hold the straw in place with erosion netting. We told him this would be done on June 23. Also, we will be taking down the fence and signs as soon as possible, pending DOE concurrence.
