Mr. W. H. Britton, President
Westinghouse Materials Company
of Ohio
P. O. Box 398704
Cincinnati, OH 45239-8704

Dear Mr. Britton:

REMOVAL ACTION MEMORANDUM: REHABILITATION OF THE MAIN OUTFALL LINE

The enclosed Removal Site Evaluation addressing the rehabilitation of the FMPC Outfall Pipeline to the Great Miami River has been reviewed by my office. Based on this review, DOE has determined that the up-grading of the Outfall Pipeline constitutes a time-critical Removal Action. The Administrative Record for the RI/FS should include this document.

WMCO should complete a Work Plan detailing the implementation of the Insituform relining alternative. This Work Plan should be submitted to my office by February 12, 1991.

In addition to this removal action, WMCO should proceed to complete the following actions to determine if additional removal actions will be required concerning the Main Outfall Pipeline:

- 1) Evaluate the soil characterization results currently being planned by ASI under the RI/FS.
- 2) If the data collected per Item 1 above warrants additional removal action (s), prepare an evaluation of possible removal action control measures and identify the recommended alternative for the additional removal action(s).

If your staff has any questions, please ask them to contact Carlos J. Fermaintt at extension 6157.

Sincerely,

Ray Hansen
Gerard W. Westerbeck
FMPC Site Manager
