JANUARY 17, 1991
DOE-609-91

Ms. Catherine McCord, Remedial Project Director
U. S. Environmental Protection Agency
Region V - 5HR-12
230 Dearborn Street
Chicago, IL 60604

Dear Ms. McCord:

**DRAFT WORK PLAN DETAILING THE REHABILITATION OF THE MAIN OUTFALL
LINE FROM MANHOLE 177 TO THE GREAT MIAMI RIVER**

- Reference: 1) Letter, C. A. McCord to A. P. Avel, "Removal #7
and Operable Unit 3 US DOE Fernald, OH6 890 008
976," dated December 13, 1990
- 2) Letter, DOE-593-91, A. P. Avel to C. A. McCord,
"Draft Evaluation of Alternatives Document for the
Rehabilitation of the Main Outfall Line and
Removal Site Evaluation for the Region between
Manholes 179 and 180," dated January 15, 1991

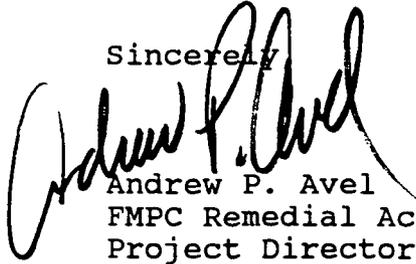

As requested in Reference 1, the Department of Energy (DOE) was required to submit a work plan detailing the work to be accomplished to upgrade the Main Outfall Line. Due to the significant changes that your comments required us to do on the subject task, the DOE requires more than 30 days to revise and complete the work plan.

However, the DOE has completed a Removal Site Evaluation and a Control Measure Evaluation, which recommend that a time critical Removal Action is needed and that relining the pipeline from Manhole 177 to the Great Miami River is necessary to handle future flow and pressure conditions, respectively. Both documents were transmitted for your information together with a response to your December 13, 1990 comments in Reference 2.

Per the technical direction provided in the Draft Evaluation of Alternatives Document for the rehabilitation of the FMPC Outfall Line from Manhole 177 to the Great Miami River, a draft work plan will be submitted for your review and approval by February 14, 1991.

If you have any questions, please contact Carlos J. Fermaintt at
FTS 774-6157.

Sincerely,

Andrew P. Avel
FMPC Remedial Action
Project Director
