Dear Mr. Watanabe:

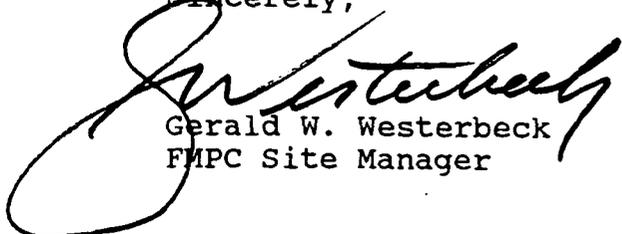

**EFFLUENT INFORMATION SYSTEM/ON-SITE DISCHARGE INFORMATION SYSTEM
(EIS/ODIS), 1989 ANNUAL REPORT, FEED MATERIALS PRODUCTION CENTER**

Enclosed are three (3) copies of the subject report; one is the original and the other two are photocopies. A table has been provided as a key to the various facilities identified by letters of the alphabet in the data sheets.

The report data has been divided into four parts. Part I contains nuclide data for fourteen previously identified release points. Part II is comprised of updated narrative summaries for the same fourteen release points. Part III contains updated narrative summaries for three inactive release points still listed in the database. Lastly, Part IV describes two new release points. They represent facilities that have been in operation for some time, but had not previously been considered significant nuclide emitters compared to total plant emissions when production was underway.

If you have any questions, please contact Behram Shroff, at (513) 738-6003 or FTS 774-6003.

Sincerely,

Gerald W. Westerbeck
FMPC Site Manager
