Mr. Graham E. Mitchell, DOE Coordinator  
Ohio Environmental Protection Agency  
40 South Main Street  
Dayton, OH 45402

Dear Mr. Saric and Mr. Mitchell:

**PLANT 9 CONTAMINATED PERCHED WATER REMOVAL ACTION**

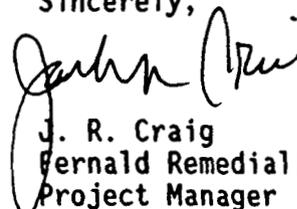

Reference: Letter, DOE-2023-91, J. R. Craig to J. Saric, "Perched Groundwater  
Removal Action Milestone Dates for Plants 2/3, 8, and 9", dated  
1890 August 14, 1991.

The purpose of this letter is to inform you that the commitment to begin pumping perched groundwater at Plant 9 has been completed by the milestone commitment date of August 20, 1991.

The United States Department of Energy (U.S. DOE) has completed the installation of the Plant 9 perched groundwater extraction/collection system per the approved Removal Action Work Plan. The perched groundwater pumping system in Plant 9 became operational on Tuesday, August 20, 1991. The extraction pumps are "float-controlled" (i.e. the pumps are actuated and shut-off by the level of groundwater in the extraction well) and are operating in the automatic mode of operation. The extracted perched groundwater is collected at Plant 9 for transport and eventual treatment at Plant 8. The groundwater is treated for volatile organic compounds and radionuclide parameters at Plant 8.

If you have any question, please contact Robert J. Janke of my staff at FTS 774-6883.

Sincerely,

  
J. R. Craig  
Fernald Remedial Action  
Project Manager

FS0:Janke
