Mr. Thomas A. Winston, Chief
Ohio Environmental Protection Agency
Southwest District Office
40 South Main Street
Dayton, Ohio 45402

Dear Mr. Winston:

**WASTEWATER TREATMENT FACILITY PERMIT TO INSTALL (PTI) APPLICATION -
MODIFICATION TO MANHOLE 34 - SPILL CONTROL PROJECT - FERNALD ENVIRONMENTAL
MANAGEMENT PROJECT (FEMP)**

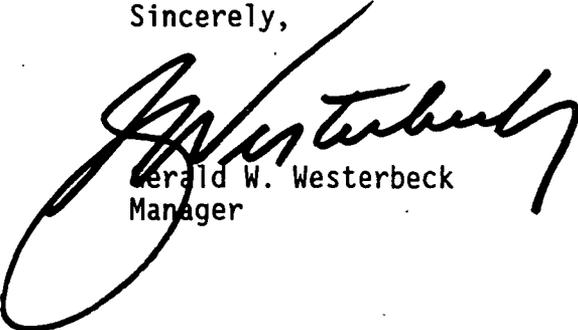

Enclosed are four copies of the Wastewater Treatment Facility PTI Application for "Modification to Manhole 34 - Spill Control Project." Also, enclosed is a check in the amount of \$333.00 to cover the plan and application fees.

The facilities proposed in this application are modifications to Manhole 34. Manhole 34 is the focal point of the FEMP storm sewer system and a control point for stormwater runoff. This project will provide the ability to isolate a spill entering the storm sewer system and route the spill to the General Sump for treatment, thereby preventing a possible discharge of spilled materials to the Great Miami River and preventing contamination of stormwater in the Stormwater Retention Basin.

This application has been prepared by employees of Westinghouse Environmental Management Company of Ohio. With their assurances that the application is true, complete, and accurate, the application has been signed by DOE.

If you require any additional information, please contact Ed Skintik at (513) 738-6660.

Sincerely,

Gerald W. Westerbeck
Manager
