RE: Removal #3 - Part I  
Work Plan Approval  
South Plume - Alt Water  
U.S. DOE-Fernald  
OH6 890 008 976

Dear Mr. Avel:

<sup>1007-90</sup> On October 14, 1990, the United States Department of Energy (U.S. DOE) submitted a work plan for the south groundwater contaminant plume (Removal #3) at the Feed Materials Production Center in Fernald, Ohio. On November 5, 1990, the United States Environmental Protection Agency (U.S. EPA) disapproved this document and U.S. DOE submitted a revision on December 6, 1990 <sup>in record</sup> for Part I of this removal. Part I involves the installation of an alternate water supply for several industrial users along Paddys Run Road.

U.S. EPA has reviewed the revised work plan for Removal #3 - Part I and is approving this document. U.S. DOE must immediately implement the work plan in accordance with the schedule contained therein.

Please contact me at (312/FTS) 886-4436 if there are any questions regarding this matter.

Sincerely yours,

Catherine A. McCord  
Remedial Project Manager
