Dr. Richard Shank, Director
Ohio Environmental Protection Agency
1800 WaterMark Dr., Post Office Box 1049
Columbus, Ohio 43266-1049

Dear Mr. Shank:

RI/FS WORK PLAN REVISION 3 - FEED MATERIALS PRODUCTION CENTER (FMPC)

This letter transmits two (2) copies of Revision 3 to the RI/FS Work Plan and supporting documentation which incorporates all comments provided by US EPA-V and your office on June 24, 1987 and December 21, 1987.

This final version of the RI/FS Work Plan and supporting documentation represents an unannotated version of the Work Plan Revision 2 transmitted with my February 11, 1988 letter to your office and is provided as discussed and agreed to in a meeting held between Department of Energy (DOE) and US EPA-V representatives on February 4, 1988.

We propose handling future changes to the sampling plan or other aspects of the RI/FS Work Plan, as requested by DOE or USEPA, as addenda to the RI/FS Work Plan. These addenda would be acknowledged and approved by your office. This approach will retain the integrity of the Work Plan and provide documentation on all requested and approved changes to the Work Plan. The recent change to the Work Plan requested in US EPA-V's letter to me subject, "Re: D and D Facility", received on March 22, 1988, will be handled in this manner.

Please contact me at FTS 774-6319 or Margaret Wilson of our Environmental Protection Division at FTS 626-8528, if you have any questions on this subject.

Sincerely,

James A. Reafsnyder
Site Manager
