P.O. Box 398705
Cincinnati, Ohio 45239-8705

Dear Mr. Tiller:

NEPA APPROVAL FOR PART 3 - SOUTH PLUME, INTERIM ADVANCED WASTEWATER TREATMENT

Reference: Letter, WEMCO:EMT(NEPA):91-146, D. L. Rathgens to I. W. Diggs, "Approval of NEPA Documentation for Waste Pit Area Removal Action," dated December 17, 1991

The above referenced letter confirms that the NEPA approval for the Waste Pit Area Removal Action Engineering Evaluation/Cost Analysis-Environmental Accessment (EE/CA-EA) and Finding Of No Significant Impact (FONSI) includes installation of the Interim Advanced Wastewater Treatment (IAWWT) facilities.

WEMCO requests concurrence by the DOE-FO that all activities covered under Part 3 of the South Plume Removal Action, IAWWT, have received NEPA approval per the reference letter. Part 3 includes the following facilities:

- 1) 300 gpm IAWWT system consisting of two (2) trailer units, located at the Storm Water Retention Basin (SWRB)
- 2) A 100 gpm IAWWT system to be located at the Bionitrification (BDN) Effluent Treatment System (ETS) facility.

Both systems, as described above, are required to reduce the FEMP level of uranium discharge to less than 1700 pounds per year to satisfy the intent of the dispute resolution for the South Plume Removal Action.

If there are any questions regarding this matter please contact Jack Hughes at extension 8471.

Very truly yours,

CONCURRENCE:

P. C. Weddle
P. C. Weddle, Vice President
