RE: OU#3 Coal Pile Basin  
U.S. DOE - Fernald  
OH6 890 008 976

Dear Mr. Craig:

The United States Department of Energy submitted a proposal for two additional boreholes and installation of two piezometers for the characterization of the Coal Pile Run-off Collection Basin for Operable Unit #3.

The United States Environmental Protection Agency (U.S. EPA) is disapproving the proposal because of the following deficiency:

U.S. DOE fails to present the objective of the proposed sampling or the rationale for the number and location of the boreholes and piezometers.

U.S. DOE must revise the proposed work plan addendum and submit it to U.S. EPA within thirty (30) days of the date of this disapproval.

Please contact me at (312/FTS) 886-4436, if you have any questions.

Sincerely yours,

Catherine A. McCord  
Remedial Project Manager
