Mr. H. F. Daugherty, President
Westinghouse Environmental
Management Company of Ohio
P.O. Box 398704
Cincinnati, OH 45239-8704

Dear Mr. Daugherty:

REMOVAL ACTION MEMORANDUM - REMOVAL OF TANK 5/CONCRETE FOUNDATION FROM GENERAL SUMP CONSTRUCTION PROJECT

The enclosed Removal Site Evaluation (RSE) for the removal of Tank 5/Concrete Foundation from the General Sump Construction project has been reviewed by my office. Based on this review, the Department of Energy (DOE) has determined that this project does not constitute a Removal Action. Waste associated with the demolition activities of this project should be removed and dispositioned following the specific controls noted within the RSE, the Management of Soil and Debris Work Plan, and per the radiological guidelines specified in the FEMP Site Policy and Procedures SSOP-00441. In addition, please verify that the actions follow the approved FEMP procedures to ensure that all potential releases are properly addressed.

At the completion of this project, WEMCO should submit a final report describing the changed site conditions, detailing the volume of waste generated, the number and type of containers used, the locations of dispositioned material (including containers), and the results of any verification sampling, if performed. Furthermore, this final report should be submitted to the Administrative Record for the RI/FS.

If you or your staff have any questions, please contact Robert Janke at extension 6883.

Sincerely,

Ray Hansen
for R. E. Tiller
Manager
