Dear Dr. Shank:

**BEST MANAGEMENT PRACTICES PLAN STORMWATER SAMPLING REPORT - FEED MATERIALS PRODUCTION CENTER (FMPC)**

The purpose of this letter is to transmit a copy of the Feed Materials Production Center's (FMPC's) Best Management Practices (BMP) Stormwater Sampling Report. This document presents results from and conclusions based on two runoff sampling events, one in April and one in July, 1988 as required as part of the FMPC Best Management Practices Plan (BMPP).

In a letter of April 13, 1988, OEPA transmitted their comments from their review of the FMPC BMP Plan Report, submitted to OEPA by DOE on March 1, 1988. This letter noted three specific deficiencies in the BMP Plan: 1) results of the stormwater sampling program were not included, 2) an indication of probable destination of spills or contaminated runoff from each of the BMP Inventory sites was not included, and 3) a proposed schedule for completion of the BMP Inventory Action Plan was not included.

On June 16, 1988, responses to satisfy OEPA comments number 2 and 3 were transmitted by DOE to OEPA. The attached Stormwater Sampling Results satisfies comment number 1, which then completes the correction of the three deficiencies found in the original BMP Plan submittal to OEPA.

If you have any questions or require additional information concerning this report, please contact Mary Stone of the FMPC DOE Site Office at (513) 738-6656.

Sincerely,

  
James A. Reafsnyder  
Site Manager
