Mr. N. C. Kaufman, President
Fernald Environmental Restoration
Management Corporation
P.O. Box 398704
Cincinnati, Ohio 45239-8704

Dear Mr. Kaufman:

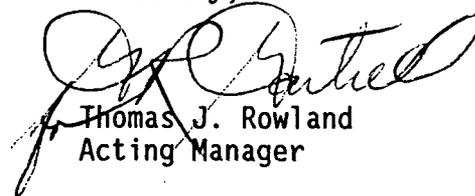

REMOVAL ACTION MEMORANDUM: SEWAGE TREATMENT PLANT INCINERATOR

The enclosed Removal Site Evaluation for the Sewage Treatment Plant Incinerator has been reviewed by my office. Based on this review and the terms of the 1991 Amended Consent Agreement, the Department of Energy has determined, from its authority under Comprehensive Environmental Response Compensation & Liability Act Section 104, that a Removal Action is not warranted. The Administrative Record file for the Remedial Investigation/Feasibility Study (RI/FS) should include this document.

The soil contamination associated with this incinerator is being adequately addressed by Removal Action No. 14, Contaminated Soils Adjacent to the Sewage Treatment Plant Incinerator, and radiological surveys confirm that the remaining contamination on the external surfaces of the incinerator is predominately "fixed" contamination. The Sewage Treatment Plant Incinerator is located within a controlled and posted radiological contamination area at the Fernald Environmental Management Project (FEMP). The site procedures should continue to be implemented for this area per the Radiological Control Manual (DOE 5480.6). The restoration of this area will be addressed through the RI/FS process and subsequently during Remedial Design/Remedial Action (RD/RA).

If you or your staff have any questions, please contact John S. Hall at 513-648-3118.

Sincerely,

Thomas J. Rowland
Acting Manager

FN:Hall
