Mr. Jack R. Craig
Project Manager
U.S. DOE FEMP
P. O. Box 398705
Cincinnati, Ohio 45239

Dear Mr. Craig:

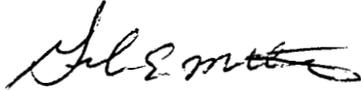

The purpose of this letter is to conditionally approve the addendum to the Soil and Debris Removal Action (No. 17) Work Plan. The conditions for approval of this addendum are that DOE addresses, to Ohio EPA's satisfaction, the comments listed below.

1. Page 2, 3rd Paragraph: It is unclear which analytical parameters are included in total metals, total VOA's and total SVOA's. DOE should either provide a list of the specific contaminants included in each analytical suite or reference a table within the SCQ which provides each list. Since it is unclear whether SVOA's include PCBs, DOE should ensure that sampling for PCBs is conducted. Analyses for PCBs is important since the disposition criteria require information concerning the presence of PCBs. Due to the multiple sources of soil for the pile it is likely that some PCB contaminated soils were placed there.
2. Attachment A, Section 5.0, pg. 6: DOE should clarify the constituents included in Total Metals, Total VOA's, and Total SVOA's.
3. Attachment A, Section 5.1, pg. 7: The table fails to include sample volumes for Total Metals, Total VOA's, and Total SVOA's. The table should be corrected.

Mr. Jack R. Craig
