**THE UNITED STATES DEPARTMENT OF
ENERGY ANNOUNCES THE AVAILABILITY FOR PUBLIC REVIEW
OF THE ADMINISTRATIVE RECORD FILE FOR THE
KC-2 WAREHOUSE/WELL NUMBER 67 REMOVAL ACTION
AT THE DOE FERNALD ENVIRONMENTAL MANAGEMENT PROJECT (FEMP)**

4645

The U. S. Department of Energy (DOE) announces that the Administrative Record File for the KC-2 Warehouse/Well Number 67 Removal Action is available for public review and comment. This removal action includes removal and characterization of sediment located at the base of the well. The sediment will be removed, drummed and stored in a controlled holding area in the FEMP former production area pending receipt of laboratory analytical data. The sediment will be analyzed for the presence of chemical and radiological contaminants. After the receipt of the analytical results for the sediments and groundwater, the well will be evaluated for plugging and abatement.

The Administrative Record File has been established to provide a progressive compilation of documentation related to the planning and implementation of the removal action. As documentation becomes available it will be entered into the Administrative Record File, typically culminating with the entry of a final report. Contents of the Administrative Record will typically include, but not be limited to: a Removal Site Evaluation (i.e., an evaluation of existing conditions attesting to the need for the removal action); Work Plans; site characterization results; status reports; correspondence between DOE and involved oversight agencies; and a removal action final report.

The Administrative Record file for the KC-2 Warehouse/Well Number 67 Removal Action is available at the following location and times:
