RE: SOLID WASTE
HAMILTON COUNTY
FEED MATERIALS PRODUCTION
CENTER LANDFILL

August 9, 1989

Mr. James Reafsnyder, Site Manager
DOE/FMPC Site Office
P.O. Box 398705
Cincinnati, Ohio 45239-8705

Dear Mr. Reafsnyder:

As you are aware, there is still pending before the Ohio EPA a permit application for a solid waste disposal facility on the Feed Materials Production Center site. In a letter from you dated February 22, 1989, you indicated that although there had been no activity on your part, you still desired it to be considered an active application. With that letter you also enclosed a "Calendar of Submittal", which, among other things, provided for notifying this office of your intentions in May of this year, and potentially submitting a revised application in July. Neither of these actions has occurred, therefore, we must ask again if the Department of Energy wishes to continue to pursue this application.

If your department decides not to continue in the permitting process, please formally notify this office of your withdrawal of the application. If the decision is to follow up on the deficiencies in the current application and proceed in the permitting process to its conclusion, please submit to us a realistic timetable for submittal of a revised application.

If you have any questions, please contact me.

Sincerely,

James M. Secunde, R.S.
District Solid Waste Engineer
