FEED MATERIALS PRODUCTION CEN.
US DEPT OF ENERGY
ENVIRONMENTAL PROTECTION DIV
OAK RIDGE TN 37831

Dear Owner:

A review of your records by this office has determined that FEED MATERIALS PROD CTR, entry point D01 is eligible for a reduction of its Phase II/V volatile organic chemical (VOC) monitoring schedule.

In accordance with Rule 3745-81-24 of the Ohio Administrative Code (OAC), upon written request, a groundwater system may reduce its quarterly monitoring schedule to annual if it meets one of the following criteria:

1. obtains four consecutive quarters of VOC monitoring without detecting any of the 21 VOCs with maximum contaminant levels (MCL), or
2. completes at least two additional consecutive quarters of VOC monitoring, after the detection of one or more of the 21 VOCs with MCLs, which are reliably and consistently below the MCL.

In order to receive this reduction you must sign and return the enclosed "reduction Request Form" as soon as possible. Systems not submitting the completed form mentioned above or a similar written request must remain on the quarterly VOC monitoring schedule.

Should you have any questions concerning VOC monitoring requirements, I can be reached by telephoning (614)644-2752.

Respectfully,

Kevin A. Mills

VOC Reduction Request Form - Groundwater

The FEED MATERIALS PROD CTR hereby requests a reduction in entry point D01's quarterly monitoring schedule.

I certify that FEED MATERIALS PROD CTR has completed the required VOC monitoring at entry point D01 , and is reliably and consistently below the maximum contaminant level.

Signature of Responsible Official
