Mr. Tom Schneider, Project Manager
Ohio Environmental Protection Agency
401 East 5th Street
Dayton, Ohio 45402-2086

Dear Mr. Saric and Mr. Schneider:

TRANSMITTAL OF DRAFT REMEDIAL INVESTIGATION REPORT/OPERABLE UNIT 5

Enclosed for review and approval is the Operable Unit 5 (OU5) Remedial Investigation Report/Baseline Risk Assessment (RI).

The OU5 RI Report is organized as follows:

Volume 1 contains the requisite Sections 1 - 7 with thorough discussions of each topic. This volume will be distinguished by its white cover and spine.

Volumes 2 - 5 contain the Baseline Risk Assessment (Appendix A), the Site-Wide Ecological Risk Assessment (Appendix B), and the supporting detail for Sections 4 (Nature and Extent of Contamination (Appendices C-E)) and 5 (Fate and Transport (Appendix F)). These volumes will be distinguished by their cream-colored covers and spines.

Plates - this binder contains 18 x 24-inch figures, primarily contaminant contour maps.

The above volumes and Plates comprise the main body of the RI Report and are provided to all those on the distribution list.

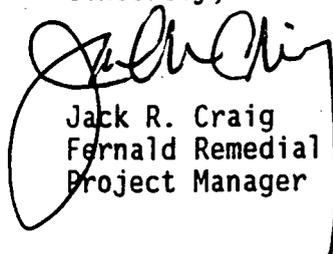

The remaining volumes contain the Reference Appendices (G through S). These volumes contain, for the most part, the "raw" data from the database, physical and chemical data summarized on logs, cross sections, logs and graphs, plus supplemental discussions of topics such as details of the myriad sampling programs used in the RI. These volumes are distinguished by their beige-colored covers and spines.

000001

Because of the large size of the Reference Appendices and anticipated limited use, only one set of these data will be provided to each review site.

Please contact Randi Allen at (513) 648-3102 if you or your staff have questions regarding the OU5 RI Report or require additional copies of any Sections and/or Appendices.

Sincerely,

Jack R. Craig
Fernald Remedial Action
Project Manager
