THE UNITED STATES DEPARTMENT OF ENERGY  
AT THE FERNALD ENVIRONMENTAL MANAGEMENT PROJECT, FERNALD, OHIO  
ANNOUNCES THE AVAILABILITY FOR PUBLIC COMMENT  
OF THE DRAFT SITE TREATMENT PLAN

The U.S. Department of Energy (DOE) at the Fernald Environmental Management Project (FEMP) announces the availability for public comment of the Draft Site Treatment Plan. The comment period will begin with the publication of this notice and end on October 31, 1994.

The Site Treatment Plan will identify how, when, and where suitable treatment capacity for the mixed wastes at DOE facilities will be developed, constructed and operated. The main goals of the FEMP Draft Site Treatment Plan are:

- To describe the preferred options for treating the mixed waste at Fernald;
- To describe other options for management of the mixed waste and how they were evaluated; and,
- To promote discussion, and solicit comments from stakeholders on the preferred options and related issues.

The Draft Site Treatment Plan contains the preferred options for treating the FEMP mixed waste currently in inventory and defines a management process for future generated mixed wastes. In addition to the preferred treatment option for each mixed waste, schedules for completion of waste characterization activities and a discussion of disposal issues are found in the plan.

The Draft Site Treatment Plan and a fact sheet on the plan are available for review at the following location and times:

Public Environmental Information Center  
JAMTEK Building  
10845 Hamilton-Cleves Highway  
Harrison, Ohio 45030  
Telephone: (513) 738-0164

Hours:
