Agency  
Region V - 5HR-12  
230 S. Dearborn Street  
Chicago, Illinois 60604

Dear Mr. Muno:

**IMPLEMENTATION PLAN FOR THE K-65 AND METAL OXIDE RESIDUE SAMPLING PROJECT**

This letter transmits a copy of the Implementation Plan for the K-65 and Metal Oxide Residue Sampling Project at the Feed Materials Production Center. This Implementation Plan was completed in accordance with Task 3 of the scope of work for the Remedial Investigation/Feasibility Study, as provided in the Federal Facilities Compliance Agreement.

DOE is conscientiously trying to implement a program that moves forward to remedial actions. It is DOE's intent, therefore, to proceed with the sampling of silo #3 during the second week of October, 1988.

It is requested that the USEPA conduct an initial review of the document and provide concurrence on the silo #3 work on or before September 30, 1988.

Sincerely,

  
James A. Reafshyde  
Site Manager
