Dear Mr. Constantelos:

WORKPLAN FOR THE FEASIBILITY STUDY OF THE FMPC

References: 1) Letter DOE-1295-88, James A. Reafsnyder to W. E. Muno, U.S. EPA, same subject, dated August 15, 1988
 2) Letter, C. A. McCord, USEPA, to James A. Reafsnyder, "FS Workplan", dated September 27, 1988

DOE sent to U.S. EPA Region V the Workplan for the Feasibility Study of the FMPC for review and approval on August 15, 1988. Per the Federal Facilities Compliance Agreement, EPA has twenty-one (21) calendar days in which to notify DOE if the submittal does not contain sufficient information for EPA review. Within thirty (30) calendar days after this EPA should notify DOE in writing of the results of its review.

We continue to work towards the cleanup of the FMPC as expeditiously as possible in accordance with information contained within the Workplan. Your comments on this document would be greatly appreciated, since the commitment per Reference 2 is now past due.

If you have any questions, please contact Erskin Howard of my staff at FTS 774-6160.

Sincerely,

Dear Mr. Reafsnyder:

The United States Environmental Protection Agency (U.S. EPA) would like to acknowledge the receipt of the Feasibility Study (FS) workplan for the United States Department of Energy's (U.S. DOE) Feed Material Production Center. Due to U.S. DOE's request for expedited review of the K-65 and Metal Oxide Residue Sampling Project proposal and other demands of the facility's Remedial Investigation, U.S. EPA will not complete review of the FS workplan within timeframes of the June 30, 1988, Federal Facility Compliance Agreement (FFCA) modification. It is expected that U.S. EPA will provide comments on the FS workplan within the next thirty (30) days.

Please contact me at (312 or FTS) 886-4436, if you have any questions regarding this matter.

Sincerely,

Craig J. Liska for
