DEPARTMENT OF ENERGY

Floodplain Notification for Proposed Removal Action at the Feed Materials Production Center, Fernald, OH

AGENCY: Department of Energy.

ACTION: Notice of Floodplain involvement and opportunity to comment.

SUMMARY: The U.S. Department of Energy (DOE) proposes a removal action to manage the radioactively contaminated groundwater in an area south of the Feed Materials Production Center (FMPC) located near Fernald, Ohio. The removal action is required under a Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) sections 120 and 106(a) Consent Agreement between DOE and the U.S. Environmental Protection Agency (EPA). The fundamental objective of the removal action is to protect public health by limiting access to and use of groundwater with uranium concentrations exceeding the DOE-derived concentration limit for uranium in drinking water. The proposed action would involve the installation of groundwater pumping wells and a transfer pump station, at grade, in the 100-year floodplain. In addition, an underground discharge line would be installed, leading north from the pump station to the FMPC, and from there eastward to an outfall in the Great Miami River. The line running north

would be about 9,000 feet long, of which 730 feet would be in the 100-year floodplain. The outfall line would be approximately 4,400 feet long, most of which would be in the 100-year floodplain. Also, an underground pipeline would be installed to two industries located in the 100-year floodplain. Approximately 3,300 feet of this pipeline would be in the 100-year floodplain. The proposed action would be carried out with the concurrence of the U.S. EPA and the Ohio EPA. The action would be performed in such a manner as to avoid or minimize impacts to the 100-year floodplain. Preliminary calculations indicate that only about 8 acres out of a total of 1,600 acres in the 100-year floodplain from Mile 19 to Mile 24 of the Great Miami River would be affected. As a result, there would be a minimal change in the downstream elevation. In accordance with DOE regulations 10 CFR part 1022, DOE would prepare a floodplain assessment to be included in the Engineering Evaluation/Cost Analysis-Environmental Assessment, which would be available for public inspection in the Administrative Record and will be distributed in accordance with 40 CFR 1506.6(b). Maps and further information are available from DOE at the address shown below.
