From: Cindy DeWulf, Ohio EPA
Re: Verification of 1993 TRI Data

Thank you for filing your 1993 Toxic Release Inventory (TRI) report. As you may know, Ohio EPA computerizes your reports and releases a summary report to the public each year. In our efforts to improve the accuracy of the database, I have enclosed a printout of the information which was entered for your facility. The summary includes the following information:

- general information about your facility;
- quantity of releases to the environment On-Site (Section 5 of the Form R);
- transfers in wastes to Off-Site locations and type of waste codes (Section 6 of Form R). Please note that if you entered an off-site location with zero releases, that location was not entered;
- On-Site energy recovery and recycling processes (Section 7B & 7C of Form R); &
- source reduction and recycling activities (Section 8 of Form R)

Please note that for facilities using reporting ranges to represent toxic releases, 5 pounds was entered for reporting range "A" (1-10 lbs), 250 pounds was entered for reporting range "B" (11-499 lbs), and 750 pounds was entered for reporting range "C" (500-999 lbs).

Please compare the summary report(s) with the copy of the Form R(s) available at your facility for accuracy and completeness. Please report to us any inaccuracies that you discover. If you find errors on the Form R(s) which were submitted, revised Form R(s) should be submitted. **If this summary report does not accurately represent the information on your TRI report, please submit any changes by February 6, 1995.**

Changes may be mailed to: Ohio EPA/DAPC/TRI
1800 WaterMark Drive
Columbus, Ohio 43215

Changes may also be faxed to us at (614) 644-3681. Please call Cindy DeWulf, Muhammad Elsalahat, or Iraj Haghazari at (614) 644-4830 if you have any questions. Your assistance is greatly appreciated.
