Dear Mr. Yates:

**REMOVAL ACTION MEMORANDUM CONTRACT DE-AC24-920H21972, ANALYTICAL LABORATORY
HOIST INSTALLATION PROJECT**

Reference: Letter from R.J. Hansen to M.B. Boswell, "CERCLA Removal Actions,"
dated April 23, 1990

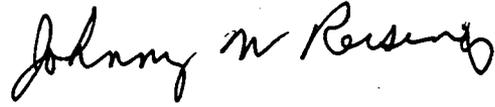

The enclosed Removal Site Evaluation (RSE) for the Analytical Laboratory Hoist Installation Project has been reviewed by my office. The RSE was prepared for this project under the authority of the Department of Energy, Fernald Area Office (DOE-FN) as lead agency in accordance with Subpart B of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). This RSE identifies sources and the nature of releases or threat of releases that may result from this project and evaluates the magnitude of the threat to human health and the environment. Based upon a review of this RSE and an evaluation of the factors to be considered under the NCP (§300.415), the DOE-FN has determined that this project does not cause initiation of a removal action.

Soil and debris associated with this project should be managed in accordance with the control measures noted within the RSE document and per the guidelines specified in the Fernald Environmental Management Project (FEMP) Site Policy and Procedures and Removal Action Number 17.

At the completion of this project, Fernald Environmental Restoration Management Corporation (FERMCO) should submit a final report describing the changed site conditions, detailing the volume of waste generated, the number and type of containers used, the locations of disposition material (including containers), and the results of any verification sampling. Furthermore, this final report should be submitted to the Administrative Record for the Remedial Investigation/Feasibility Study (RI/FS).

If you have any questions, please contact Anand Shah at (513) 648-3146.

Sincerely,

Johnny W. Reising
Acting Associate Director
Environmental Management
