Cincinnati, Ohio 45253-8704

Dear Mr. Ofte:

APPROVAL OF NITRIC ACID TANK CAR CLOSURE

Enclosed is a letter from the Ohio Environmental Protection Agency (OEPA) acknowledging that the closure of the nitric acid tank car hazardous waste management unit was performed in compliance with the approved closure plan and Ohio Administrative Code.

If you have any questions on this subject, please contact John Sattler at 648-3145.

Sincerely,

A handwritten signature in black ink that reads "Glenn Buzjitts".

P.O. Box 398705
Cincinnati, Ohio 45239-8705

Dear Mr. Hamric:

According to Ohio EPA records, on August 31, 1994, the Director of Ohio EPA approved a closure plan submitted by U.S.D.O.E. - FEMP. The plan concerned the hazardous waste nitric acid tank car located at their facility. On November 1, 1994, U.S.D.O.E. - FEMP submitted to the Director certification documents stating that the hazardous waste nitric acid tank car had been closed according to the specifications in the approved closure plan. Ohio EPA District Office personnel completed a certification of closure inspection on February 2, 1995 and a review of documents pertaining to the hazardous waste nitric acid tank car on January 30, 1995.

Based on this inspection and review, the Ohio EPA has determined that the hazardous waste nitric acid tank car has been closed in accordance with the approved closure plan and Rules 3745-66-12 through 3745-66-15 of the Ohio Administrative Code (OAC). U.S.D.O.E. - FEMP will continue to operate as a treatment, storage, and disposal (TSD) facility and a large quantity generator (LQG) of hazardous waste.

Please contact the Ohio EPA, Southwest District Office, Attn: Chris Budich, 401 E. Fifth Street, Dayton, Ohio 45402-2911, tel: (513) 285-6357 if you have any questions concerning the closure process or the facility's status.

Sincerely yours,

Thomas E. Crepeau, Manager
Data Management Section
Division of Hazardous Waste Management
