RE: DOE FEMP
MSL #531-0297
HAMILTON COUNTY
COMMENTS - PLANT 1 ORE
SILO FINAL REPORT

Mr. Jack Craig
Director
U.S.DOE-FEMP
P.O. Box 398705
Cincinnati, Ohio 45239-8705

Dear Mr. Craig:

The Ohio EPA has reviewed DOE's "Transmittal of Removal Action Number 13, Plant 1 Ore Silos Final Report" submitted on June 13, 1995. Ohio EPA has the following comments on the document:

1) Commenting Organization: Ohio EPA Commentor: OFFO
Section #: 2.4.3 Pg #: 2-10 Line #: Code: C
Original Comment #:

Comment: This section states that the DCG for Th-230 was used because it is the most limiting of all radionuclides that may have been present in the ore silo storm water run-off. Please further define within the text what is meant by the term "most limiting".

Response:
Action:

2) Commenting Organization: Ohio EPA Commentor: OFFO
Section #: Table 3-4 Pg #: 3-20 Line #: Code: C
Original Comment #:

Comment: Please provide the volume estimates of the Plant 1 Ore Silo waste materials broken down by waste type (steel, concrete, ore silo raffinate, etc.). This information is valuable since the proposed on-site disposal cell will be designed based on volume. We are also interested in determining how closely the predicted volumes agreed with the actual volumes of wastes that resulted from the removal action. All future OU3 D&D project reports should also list waste material volumes in a similar manner.

Response:
