JAN 29 1996
DOE-0487-96

Dear Stakeholder:

COMMUNITY MEETING INFORMATION

At the December 12, 1995, Community Meeting the break-out groups focused on:

- Remedial Design Process and Opportunities for Public Involvement
- 10-Year Accelerated Cleanup Plan

As a result of your feedback during these sessions, I have enclosed some items you might find beneficial:

1. **The 10-year plan information presented by Jack Craig in his break-out session.**
2. **A 1996 calendar identifying meetings/availability sessions tentatively scheduled for the year. All To Be Determined (TBD) meetings are not confirmed, but are being discussed as possibilities. Obviously, more meetings/workshops will be added if issues/topics arise where the community requests information.**
3. **A timeline of major design deliverables for each operable unit. Workshops and public meetings are not required under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) during the remedial design. However, DOE has committed to continue to conduct workshops/availability sessions at key points in the timeline for each operable unit, if the public continues to show an interest during this phase.**
4. **An artist's interpretation of the Fernald site at different stages of remediation throughout the 10-year plan. This gives an idea of what DOE envisions if the necessary funding is appropriated through Fiscal Year 2005.**

If you have questions on any of the enclosures, or need more information, please call me at (513) 648-3153.

Sincerely,

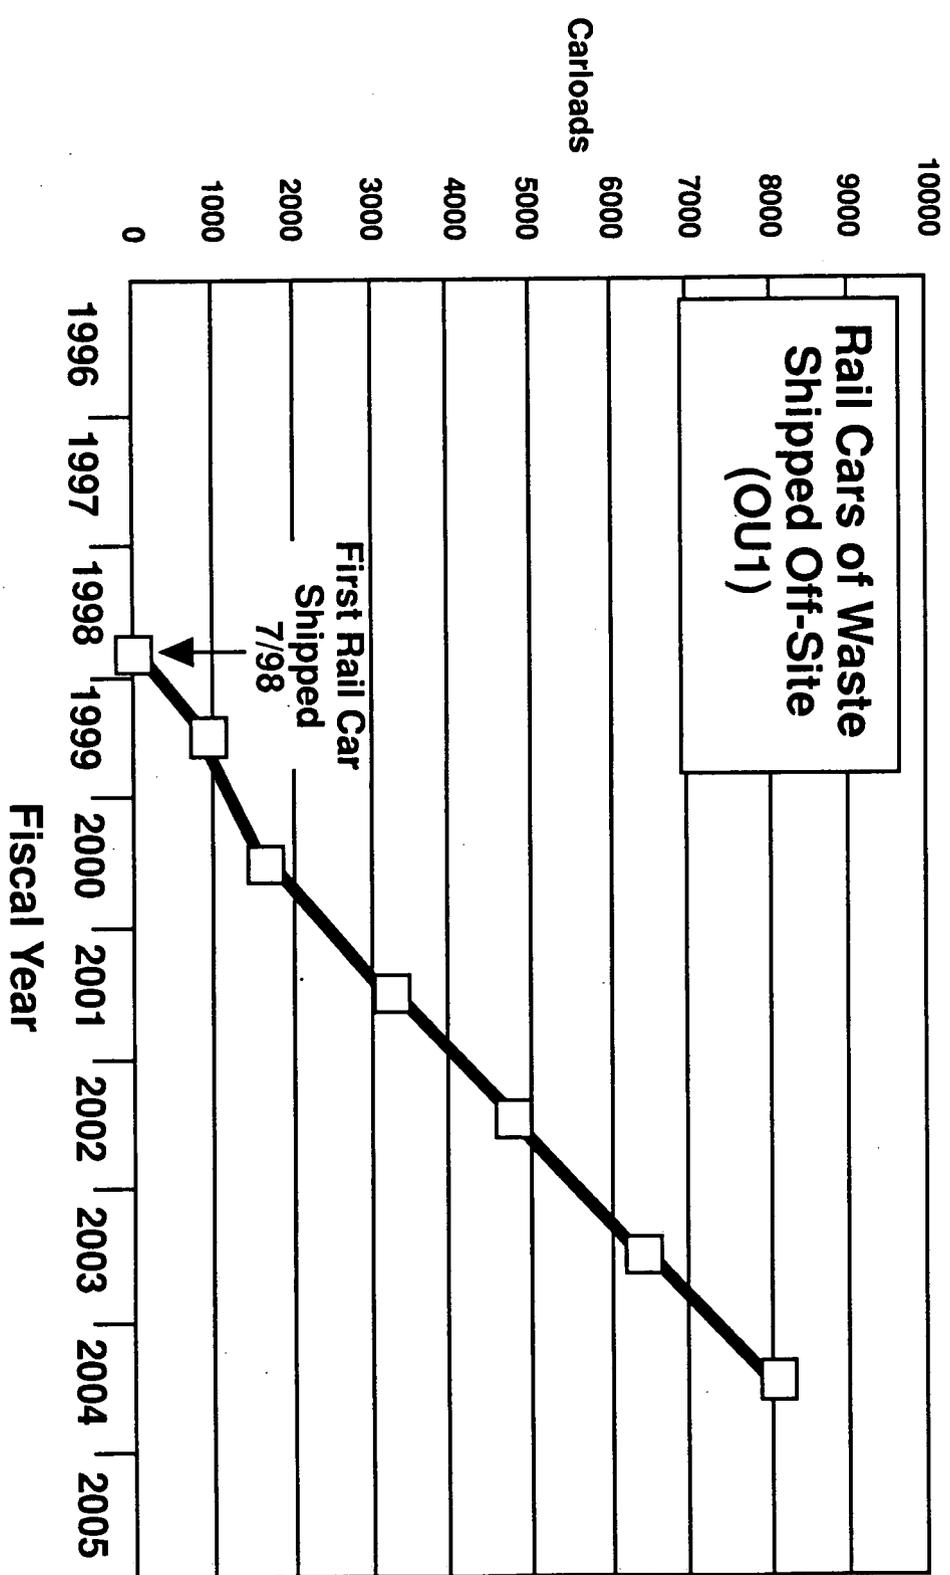

Gary D. Stegher
Public Affairs Director

FERNALD

Design components Package I includes:

- Design Criteria Document
- Plant Facilities Engineering
- Equipment Specification:
 - Shredder
 - Indirect Dryer
 - Waste Loadout System
- Offgas Control System
- Site Improvement Plan
- Construction Schedule

Design Components Package II includes:

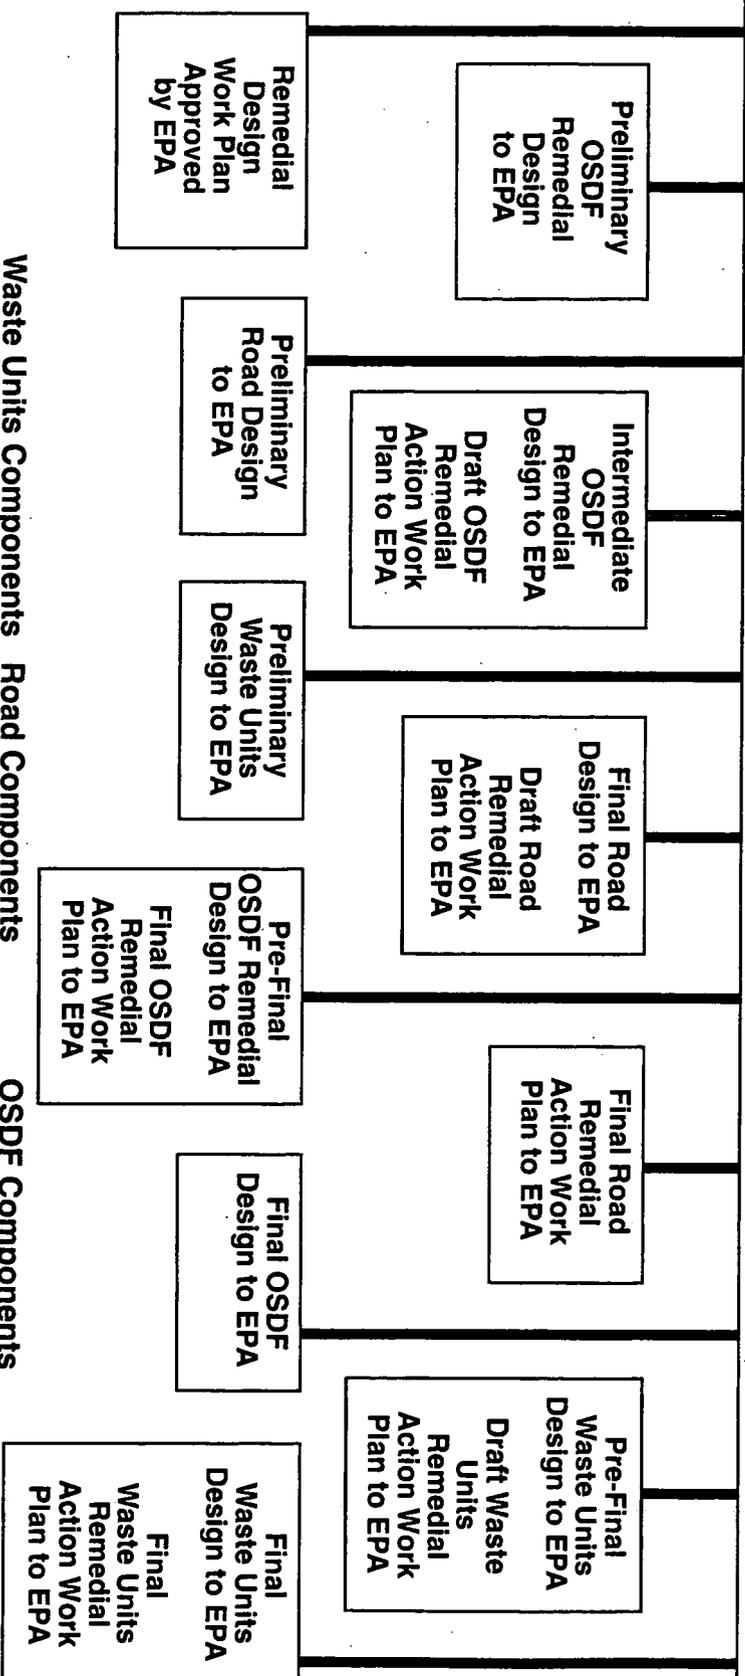

- Excavation Plan
- Transportation and Disposal Plan
