Dayton, Ohio 45402-2911**

Dear Mr. Saric and Mr. Schneider:

**NOTIFICATION OF ADVANCED WASTEWATER TREATMENT SYSTEM (AWWT) AND
SOUTH PLUME LINE MAINTENANCE ACTIVITIES**

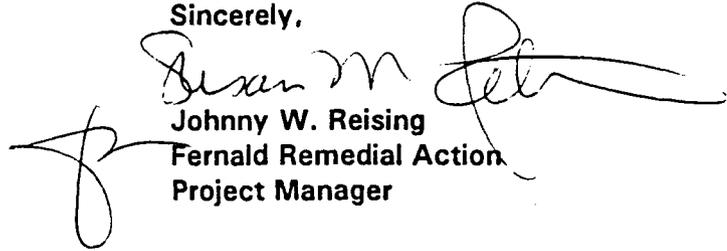

The Fernald Environmental Management Project (FEMP) will conduct maintenance activities the week of June 24, 1996, which will require the temporary shut down of the Advanced Wastewater Treatment System (AWWT), the South Plume Interim Treatment System (SPIT), the Interim Advanced Wastewater Treatment System (IAWWT), and the South Plume water line. Maintenance activities include:

- 1) The subcontractor for the multi-media filter installation will complete the tie-ins. These tie-ins will transport the water from the clarifier tanks to the multi-media filters;
- 2) A valve in the South Plume valve house will be replaced to increase back pressure control in the South Plume water line; and,
- 3) The pump will be removed from Recovery Well Number 3 to determine the cause of pump failure.

These maintenance activities are expected to be completed within one week. Water levels in the storm water retention basins and biosurge lagoon have been lowered to accommodate wastewater storage. Bypassing of water to the river is not anticipated.

If you have any questions regarding our implementation of these requirements, please contact Robert Janke at (513) 648-3124, or Kathi Nickel at (513) 648-3166.

Sincerely,

Johnny W. Reising
Fernald Remedial Action
Project Manager
