RE: Plant 7 Lead  
Decontamination and  
Recycling Final Report

Dear Mr. Reising:

The United States Environmental Protection Agency (U.S. EPA) has completed its review of the United States Department of Energy's (U.S. DOE) final report for Plant 7 lead decontamination and recycling.

The report documents the results and lessons learned from this recently completed recycling project.

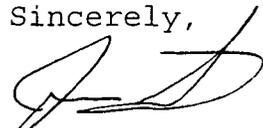

Although the report clearly and adequately describes the project there is no discussion regarding the management of primary waste, or material that is not decontaminated and is returned to the site.

Therefore, U.S. EPA approves the report pending receipt of adequate responses to the attached comments. U.S. DOE must submit a response to comment document within thirty (30) days receipt of this letter.
