RE: Removal Action: 20  
Final Report

Dear Mr. Reising:

The United States Environmental Protection Agency (U.S. EPA) has completed its review of the United States Department of Energy's (U.S. DOE) Removal Action (RA) 20, uranyl nitrate project final report.

The report summarizes the activities conducted under RA 20 to neutralize and dispose approximately 200,000 gallons of uranium dissolved in nitric acid.

The final report adequately discusses the actions taken and summarizes the results of the RA. The action appears consistent with existing engineering applications.

Therefore, U.S. EPA approves the RA 20 final Report. Please contact me at (312) 886-0992 if you have any questions regarding this matter.

Sincerely,

James A. Saric  
Remedial Project Manager  
Federal Facilities Section  
SFD Remedial Response Branch #2
